B-595 Indoor/Outdoor Vinyl Tape for the GlobalMark® Printer

As from April 1st 2010, Brady's leading outdoor grade vinyl for the GlobalMark® Printer is being replaced by a new B-595 vinyl. This new vinyl has even better performance and the most aggressive adhesive ever offered for the Globalmark® Printer – all at the same price and roll length. These new B-595 labelling supplies are ideal for indoor and outdoor facility labels, including 5S labels, safety labels, warning labels, pipe markers, arc flash labels, equipment labels, and visual workplace labels.

With the advanced adhesive and low-shrink construction, new B-595 vinyl is now also recommended for "problem applications" that prove difficult for most typical vinyl materials:

- **More Aggressive Adhesive:** B-595 vinyl will adhere to difficult low surface energy items, including: PVC piping, blow-molded equipment cases, ABS plastics, powder-coated surfaces and equipment made from recycled plastics. The B-595 material also excels at sticking to highly textured surfaces such as painted cinder block walls, finished uneven wood, textured plastics, rough-pipes and paper-jacketed pipes.
- **Lower Application Temperature:** B-595 vinyl can be applied at -18°C instead of +5°C or above. Service temperature has increased to 82°C.
- **Low-Shrink Vinyl:** B-595 vinyl diminishes unsightly buildup of dust and grime around the label edge that is typically seen with vinyl labels.

B-595 Continuous Vinyl Tape

- Adheres to pipes, walls, equipment – most clean dry surfaces
- Conforms to rough, curved and highly textured surfaces
- Stands up to grease, oil and most industrial chemicals
- 8 to 10 year outdoor durability average in temperatures from -40°C to 82°C
