

Critical supplies for hazardous materials

Absorbents and Spill Control

If your testing and health services demands are up but your absorbent supply is down, let us help. Absorbents and other spill control products are critical for containing and cleaning up hazardous materials in any healthcare environment.

Ship to CDC standards

When you need to ship samples – COVID-19 patient specimens, cultures, isolates – ship the right way. Because they're a biohazard, the CDC requires that the primary container holding the sample gets wrapped in an absorbent material. It's not only called out in the [Category B UN3373 regulation](#), but is also mandatory material on the packaging checklist. Your solution:

Spill Response Plus Universal Plus Absorbent Pad (SRPH144)

- Ultra-absorbent, smaller-size pad that fits into biohazard bags
- 4-in W x 4-in L; 1,000 brightly colored absorbent pads per case
- 4-in W x 6-in L (SRPH146) and 6-in W x 6-in L (SRPH166) pads also available

Healthcare facilities

Whether working at a temporary healthcare site or hospital, you'll need quick response kits and supplies that can keep both your patients and staff safe. Your solutions:

Economy Spill Kit (SKH-PP)

- Yellow PVC bag offers high visibility for locating in emergency situations
- Ideal kit for fast spill response in space-constrained environments

Mobile Spill Kaddie (SKH-K2)

- Ideal for temporary sites, hospitals and lab environments
- Water- and chemical-resistant and can be easily transported in case of emergency

Chemical Pads and Rolls (SPCUN / SRPH)

- Safe to use with heavy industrial sanitizing solutions
- Best suited for bodily fluids and other chemical cleanup needs

BrightSorb® Kits (SKCH)

- A high-visibility, all-in-one cleanup solution for slip hazards in temporary environments
- Safe for use with bodily fluids and other chemical cleanup needs

HandySorb Mop (HANDYSORB-MOPKIT)

- Clean up without direct contact with bodily fluids or other dangerous liquids
- Removable heads provide no-touch changing when needed

Outdoor spill readiness and control

Expanding healthcare options to convention centers or parks requires added supplies for both safety and environmental protection. Portable kits can provide a quick response for leaks, overfills and fuel spills.

Oil-only Spill Kit (SKO)

- Can quickly address spills from generators and other temporary mechanical equipment
- Best suited for gasoline, diesel and other oil-based spills
- Smaller kit sizes are ideally sized for outdoor storage next to machinery

SpillFix® Granular (multiple options available)

- Encapsulates liquids to prevent leaching out once absorbed
- All-natural coconut husk granulars are safe for use in outdoor environments

Barrier Spill Mats (BSM100 / BSM300 / BSM3650)

- Ideal for setting up in mobile or temporary testing facilities
- Stands up to heavy foot traffic; barrier backing won't allow spills to spread
- Wider 36-in. width (BSM3650) allows for more room to work

Drain Seals (multiple sizes available)

- Perfect for sealing drains and protecting waterways

When it comes to absorbents and spill control, be sure to stock up on critical supplies. So, when a quick response is needed in your lab, hospital or test site, you'll be ready.
