

WHEN PERFORMANCE MATTERS MOST™

Acid Spill Kit, Base Spill Kit and Battery Acid Spill Kit

Safely remove acid, base and battery acid spills

www.bradyeurope.com/spillcontrol

Extremely practical

The Acid Spill Kit, Base Spill Kit and Battery Acid Spill Kit each contain a selection of solutions that enable users to combat small to medium spills:

- highly absorbing pads to wipe down equipment and remove spills
- SOC's to prevent spills from spreading on the workfloor
- neutralising polymers to neutralise acids and bases
- gloves and glasses to protect employees
- a waste disposal bag to contain all used equipment

Also included in each spill kit are practical, visual instructions for optimal product use.

Article No.	Order Reference	Description	Absorption Capacity (Ltrs)
241135	SKH-BATT-E	Battery Acid Specialty Spill Kit	20
241138	SKA-BKTACID-E	Acid Neutralising Chemical Specialty Spill Kit	17
241139	SKA-BKTBASE-E	Base Neutralising Chemical Specialty Spill Kit	17

Fast response

Each spill kit is lightweight and easy to move quickly near a spill to enable fast response. The Acid Spill Kit, Base Spill Kit and Battery Acid Spill Kit are also clearly labelled so workers can instantly recognise the best spill kit to remove the current spill.

Absorb spills safely

The contents of each spill kit enables users to safely remove spills. PPE gloves and glasses can easily be retrieved from the kits to protect employees before they start spill removal. To further limit contact with harmful acids and bases, neutralising polymers are included that will change colour when acids or bases are neutralised. On top of this, our meltblown polypropylene and granular spill control solutions are inert and will not react with any chemical.
