

Fast and durable PIA Identification

Brady PIA Tags

Ever lost time figuring out where each wire goes?

Durable professional labels that remain legible and stay attached in harsh conditions such as underground or outdoors are extremely important to keep power, network, voice and data cables and components organised and running effectively.

Gone are the days of not being able to read PIA labels

Not only is writing dozens of tags very time-consuming, often tags become illegible because the pen's ink does not withstand the environment in which the tag is being used or sometimes a person's handwriting is difficult to read.

With Brady's B-7597 PIA tags you will take the guesswork out of the equation. Print these tags on the M610 Portable Label Printer and you can:

- Rely on a durable tag with long-term readability
- Design your own templates
- Insert logo's onto the tag
- Print multiple tags in seconds

Label your way

- Print PIA labels on the go directly with the M610 Label Printer in stand-alone mode.
- Easily design the most complex labels in the field using only your smartphone and Brady's free Express Labels app before printing your PIA label with the M610 Label Printer.
- Prepare your PIA labels offsite using the Brady Workstation Product and Wire Identification Software Suite on your PC, allowing you to import graphics and serialised data.
