

BMP61 PRINTER

LABEL LIBRARY UPDATE

We have recently made updates to our BMP61 printer label cartridges to enhance printing capabilities. **To use newly purchased label cartridges, you may need to do a label library update — use the process below:**

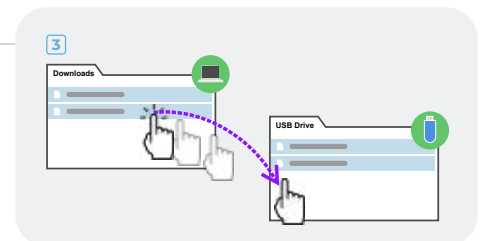

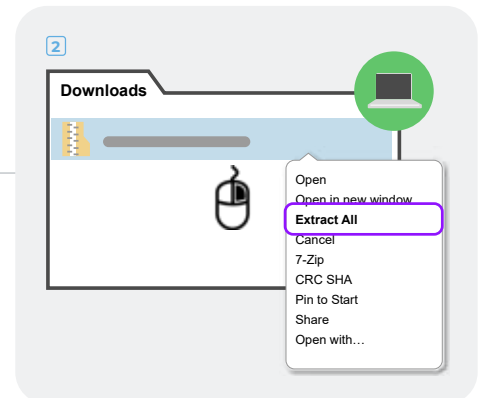

WHAT YOU NEED:

- ▶ Your BMP61 Label Printer
- ▶ USB Memory stick

WHAT YOU NEED TO DO:

- 1 Download the latest Printer Label Library file on your computer
▶ [DOWNLOAD NOW](#)
- 2 Open downloads folder, right click file and choose “Extract all”
- 3 Copy the Excel and BIN file to your USB memory stick
- 4 Remove the memory stick and insert into your BMP61 printer
- 5 Power printer on, the printer will detect the upgrade files, and show a screen prompt. Select “Upgrade”
- 6 Select “Yes” on the next prompt to confirm upgrade
▶ You may be prompted with an option to delete files from the memory stick. Select “Ignore” if you have additional BMP61 printers otherwise select “Delete”
- 7 Remove the memory stick from printer and reboot the printer
IMPORTANT: The printer will continue to try to update the firmware if you do not remove the memory stick.
