

# BS5609 Certification for B-595 & B-7569 Labels

The BS5609 British Marine Standard ensures that identification and warning labels are tested to remain intact and legible for use on chemical drums shipped by sea. To ensure the durability and safety of our label materials, Brady's B-595 and B-7569 label materials, and approved ribbons (R10000 black/red for B-595, and R6000 or R10000 black for B-7569), were tested and achieved BS5609 certification.

## About BS5609:

- Requirement for merchant shipping regulations, International Maritime Dangerous Goods (IMDG) certification and the Globally Harmonized System of Classification and Labeling of Chemicals (GHS)
- Section 2 and 3 detail the required testing to ensure that a label will remain adhered and legible when submerged in seawater for three months
- Section 2 tests the base label material against marine exposure through salt spray, sunlight, temperature cycling and more
- Section 3 tests determine print permanence, abrasion resistance and legibility after exposure to salt spray and sunlight

## Brady BS5609 Certified Labels:

| Label  | Ink                                | Substrate         | Printer              |
|--------|------------------------------------|-------------------|----------------------|
| B-595  | R10000 Black/Red (B30-R10000-KR-8) | White Gloss Vinyl | BBP®37 Label Printer |
| B-7569 | R6000 Black (B30-R6000)            | White Gloss Vinyl | BBP®37 Label Printer |
| B-7569 | R10000 Black (B30-R10000)          | White Gloss Vinyl | BBP®37 Label Printer |
