

First, answer these questions to calculate your cost of labeling without automation

Cost of labour per hour?

Amount of print jobs ran per hour?

Minutes spent per print job?\*

Number of days printing?

Number of hours working per day?

Amount of label errors per year?

Cost to resolve the errors per year?

Cost of labelling without automation:

\* Opening file, getting the data, placing the data on the label and pressing print (we exclude the printing time itself as that is the same (4/s))

## Brady Workstation Data Automation app

Automation price for software? (€/£/\$)

Implementation time in minutes?

IT hourly rate?

Total set up cost:

Data Automation saving:

First year

Second year

## Brady Workstation Scan & Print app

Automation price for software? (€/£/\$)

Implementation time in minutes?

IT hourly rate?

Total set up cost:

Scan & Print saving:

First year

Second year

## Brady Workstation Advanced Import app

Automation price for software? (€/£/\$)

Implementation time in minutes?

IT hourly rate?

Total set up cost:

Advanced Import saving:

First year
