Brady Workstation Apps
for the BradyJet J5000 Color Label Printer

Now you can easily create labels on your PC and send them to your printer with Brady Workstation. The steps are simple:

STEP 1:
Download Brady Workstation at **workstation.bradyid.com**

STEP 2:
Fill the workstation with the following apps available for the BradyJet J5000 printer. Most of the apps are free, while others vary in cost with the option of a 14-day free trial. They feature built-in regulations and standards, pictograms, common phrases, data importing, guidance and help functions.

- **Custom Designer App:** Design anything you can imagine in this free app. Start with a blank canvas to create a label or sign that meets your unique needs. Add barcodes or QR codes, import data from Excel and more!

- **GHS Labels App:** Creating GHS labels is now amazingly simple. Enter your SDS data one time through a simple drop down list and text entry, and you can create any size label and print it at any time.

- **Lockout Writer:** Quickly create compliant lockout tagout labels with full-color photos. This app includes procedure printing templates, simple translation between set languages, easy-to-use image editing for callouts and import capabilities from Lockout-Pro® software.

- **Arc Flash:** Enter or import the assessment data for your equipment, then use the built-in templates to create and print your NFPA compliant arc flash labels with a few simple clicks. Send your labels to the Custom Designer app, change critical information to red and print arc flash labels.

- **Express Signs:** Create signs in no time! Simply pick a template, enter your information and it's ready in minutes. Want to try a different look? With just a single click, you can pick another layout, and don't worry, the sign info you entered will stay the same.

- **Pipe Marker:** Now it's easy to comply with ANSI/ASME 13.1 2007. This app allows you to create the customized pipe markers you need, then save them to use again whenever you want more. Still following the 1996 version of the standard? We've got that covered too.

STEP 3:
Save time by quickly designing labels within the app and then printing them on your BradyJet J5000 printer.
