

Locked out and locked down

BatteryBlock™ Power Connector Lockout – Forklift

For forklift safety, proper operation is certainly a main concern, but a secure lockout during maintenance can be just as important. With the BatteryBlock Power Connector Lockout, you ensure both by keeping your forklift locked out and locked down. **Unlike current products on the market, this device fits on 175A and 350A power connectors with and without handles.**

Other helpful features include:

- **Single-piece design** – Don't keep track of extra pieces if you don't have to
- **Non-conductive pins** – Ensure the device stays tightly in place during off-shift periods or maintenance projects
- **Space for two padlocks** – Manage use and safety by applying two padlocks from authorized employees

The winning highlights

How you win: Fits 175A and 350A power connectors with and without handles

Where you win: Use on a variety of industrial lift vehicles, including:

- Forklifts
- Pallet jacks
- Powered carts
- Scissor lifts
- Stackers
