

BradyConnect

Inspection Manager

BradyConnect
SAFETY. COMPLIANCE. PRODUCTIVITY.

The Fully Connected Solution

Brady's fully integrated safety, identification and business productivity solution offers a seamless experience for facility management by combining inspection management software with label creation software and label printing solutions.

BradyConnect Inspection Manager Cloud-Based Software

Intuitive software to help you identify and track assets, schedule and complete inspections, and create reports. Learn more at Connect.BradyID.com

Brady Workstation Asset Tag App

This app, available through Brady Workstation label creation software, allows you to quickly create standardized, professional asset tags or location labels by selecting a layout, entering asset information and printing. Learn more at Workstation.BradyID.com

Printers & Consumables

Brady's full line of portable and benchtop printers offer reliable, on-demand label and tag printing. These printers also feature a wide range of our durable label consumables to meet your application needs. Learn more at BradyID.com

BradyConnect Inspector App

Mobile app designed for efficient asset tracking and inspection management in the field with barcode scanning, inspection checklists, alerts and more.

BradyConnect Inspection Manager System

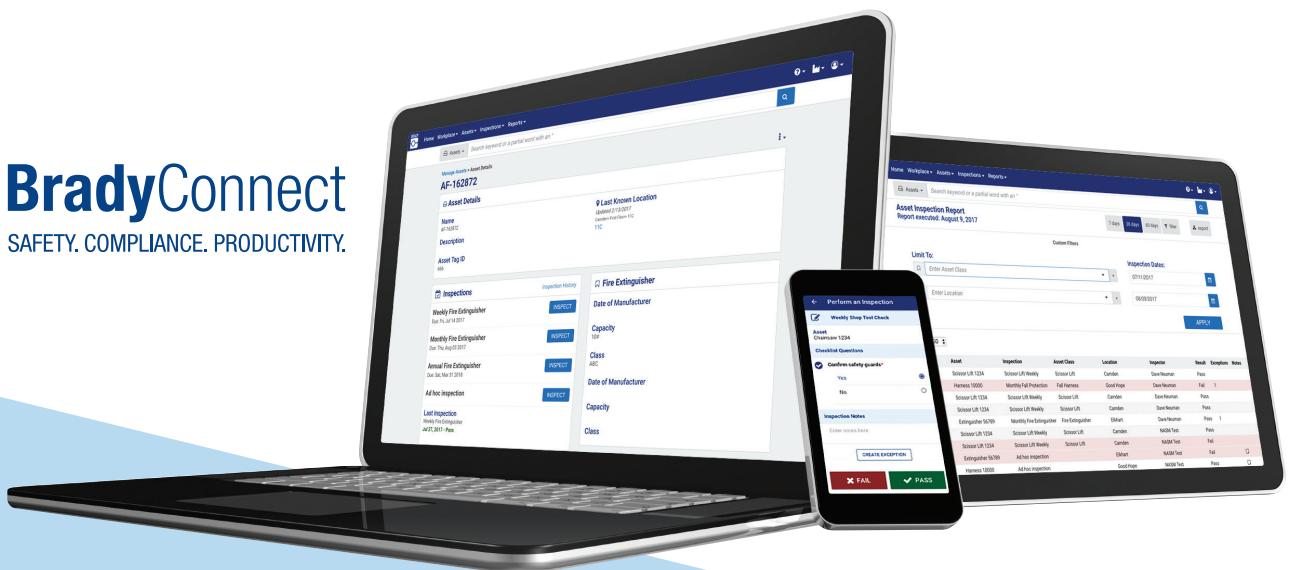

Your fully integrated solution for connecting and managing equipment and safety inspection programs.

When it comes to establishing a safe, compliant and productive workplace, an effective facility management solution is critical. BradyConnect software can improve your operations by offering one centralized, cloud-based and flexible system to manage and stay connected with your asset and inspection workflows.

Start maximizing workplace efficiency and streamlining processes with BradyConnect's task-specific applications, intuitive dashboard, simple integration across your operations and more – all backed by Brady's manufacturing and safety expertise.

BradyConnect
SAFETY. COMPLIANCE. PRODUCTIVITY.

Connect with the Benefits

The BradyConnect Inspection Manager system helps you to:

Streamline Processes

- **All-in-one facility management** means less tools are needed and all of the necessary programs are in one place to manage assets and safety processes
- **Integrated identification and printing** brings data from the cloud to your PC and then right onto labels and tags to save time and reduce errors from manual entry
- **Task alerts and assignments** allow for a more efficient and organized workflow with manual or automated task assignments, due dates and notifications
- **Cloud platform** means you have a central database for all data, allowing multiple employees to access at once

Maximize Productivity

- **User-Friendly interface** with an intuitive dashboard enables quick and easy asset and inspection management
- **Task-specific apps** are optimized to help you get work done quickly, so you can spend less time on paperwork and more time on your facility's safety and operations
- **Search capabilities** help you effortlessly find data, including equipment, location, assignment, fields and more
- **Training and support** from Brady brings you seamless onboarding, training and on-going customer support to keep your processes running smoothly

Improve Safety & Compliance

- **Exceptions and corrective actions tracking** enables you to improve compliance and stay up-to-date on NFPA fire safety and OSHA inspections by monitoring and defining the necessary steps to address issues noted
- **Inspection history** gives you easy access to inspection records for auditing and reporting purposes
- **Brady industry expertise** brings over 100 years of manufacturing and safety experience to your BradyConnect systems to meet the needs of our customers
- **Stable and secure software experience** means less worry and more trust in your data

Connect with the Process

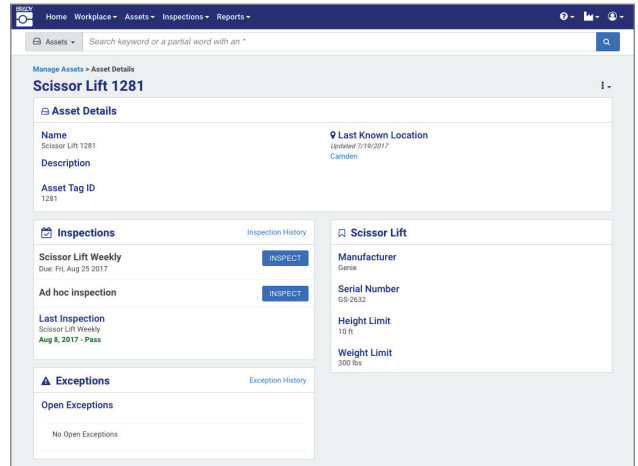

Staying compliant can be overwhelming, and manual processing and paper checklists aren't ideal for meeting your needs. With the BradyConnect Inspection Manager system, you have easy insight into tasks, due dates, progress and more – helping you to do more with less.

1. Identify & Track Assets

Asset Classes: Define the types of assets to track or inspect.

Assets: Create & edit specific asset records.

Asset Tags: Import asset records and print assets tags/labels.

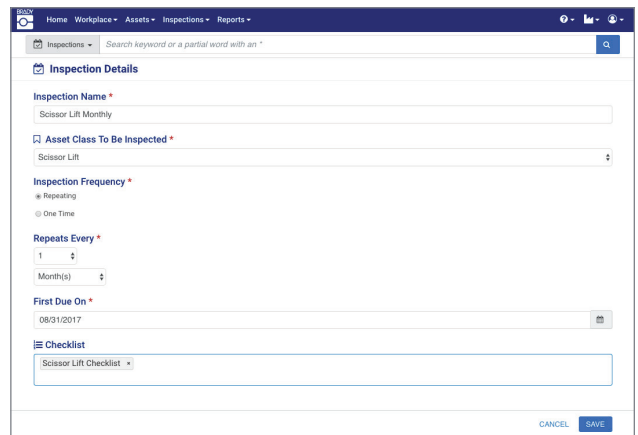

2. Schedule & Assign Inspections

Checklists: Create checklist forms to be completed during inspections.

Schedules: Define recurring and on-demand inspections.

Assignments: Auto-assign inspection tasks to employees.

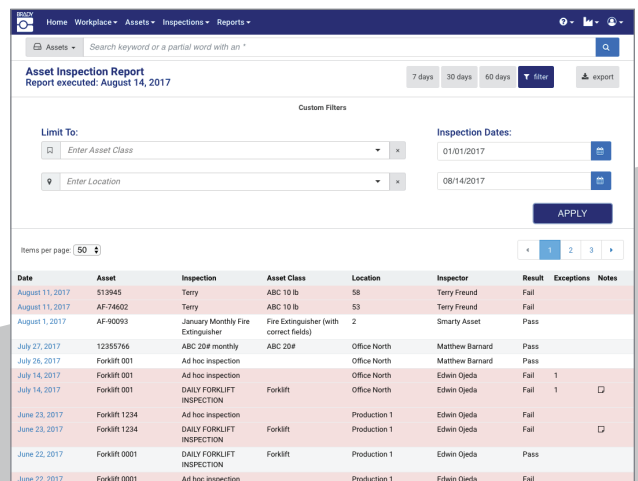

3. Inspect & Report

Inspections: Identify assets and complete assigned inspection checklists.

Exceptions: Capture and resolve non-compliance issues.

Analytics: Easily navigate dashboards and create reports.
