

Detectable Underground Warning Tape

Enhance safety and prevent excavation accidents with reliable detection and protection of buried utility lines

- Comes in APWA approved colors to meet or exceed industry standards
- Metal detectable for identification prior to digging
- Tape will identify contents and direction once uncovered

Description	5-mil tape with aluminum backing makes it easy to find underground assets using a non-ferrous locator. Wider tapes help locatability at greater depths.	
Use	For non-metallic underground installations such as utility lines, PVC, and non-metal piping. The aluminum core allows detectability through a non-ferrous locator so the deeper the burial the wider the tape should be.	
Adhesive Type:	Self-Adhesive	
Substrate Type:	2 mil clear film laminated to 1/2 mil Aluminum Foil Center Core	
Compliance	Complies with APWA colors	
Standard Legend Colors:	Black	
Standard Background Colors:	Material withstands temperatures of up to 2700°F (Ink Fill up to 233°F)	
Thickness:	.005 inches	
Standard Sizes/Dimensions:	Width	Recommended Depth
	2"	up to 12" depth
	3"	up to 24" depth
	6"	up to 36" depth
