

Non-Detectable Underground Warning Tape

Enhance safety and prevent excavation accidents
with reliable identification of buried utility lines

- Comes in APWA approved colors to meet or exceed industry standards
- Bury close to surface for fast identification as soon as digging starts
- Tape will identify contents and direction once uncovered

Description	Underground warning tape makes it easy to find underground assets. Metal free and resists elements such as acids, alkalis, and other soil components. Tape must be visibly seen before it can be read.
Use	Bury tapes as close to ground surface as possible (4" - 6" is ideal); the first shovel out will immediately expose the bright tape color to prevent damaging the utility line below.
Adhesive Type:	Self-Adhesive
Substrate Type:	Heavy duty 4-mil polyethylene tape
Compliance:	Complies with APWA colors OSHA 1926.965 (c) (1)
Standard Legend Colors:	Black
Thickness:	.005 inches
Standard Sizes/Dimensions:	3" 6"
