- ▶ Edge-to-edge printing
- ▶ Ethernet/USB connection
- ▶ 300 dpi
- ▶ 300 cards per ribbon
- ▶ 100-card capacity
- ▶ Digital shredding feature

PA1300 ID CARD PRINTER

HOW DOES BRADY HELP SECURE THE WORLD?

Brady PA Series ID Card Printers provide high-quality, high-performance identity solutions backed by unmatched reliability and security.

- ▶ Visual confirmation to confirm genuine company identity and keep employees and visitors safe
- ▶ Personalized smart ID cards for access control or time and attendance
- ▶ High-quality card printing to create unique IDs with barcode, QR code and magnetic stripe encoding
- ▶ Card encoding technology for access control, transit, library services and financial transactions
- ▶ Customer promotion with loyalty cards, product labeling, memberships and events

HOLOKOTE®

- ▶ We're all about security. That's why the HoloKote® secure watermark is applied to each card during the printing process.

CUSTOM HOLOKOTE®

- ▶ This feature facilitates the implementation of a personalized HoloKote® watermark into the standard printing process. This watermark could be a logo or some other unique security design.

HOLOPATCH®

- ▶ HoloPatch® cards have a highly reflective gold super diffuser seal. When the HoloKote® watermark is printed onto the seal, the watermark becomes clearly visible under all lighting conditions from a distance and has a similar appearance to hologram seals.

DIGITAL SHREDDING

- ▶ Our printers offer additional security in the form of Digital Shredding™ — once data has been used for the print job, it is fragmented, rendering it irrecoverable and ensuring there is no repository for data.

THREAT BENCHMARKING

- ▶ Threat Benchmarking runs security scans against the National Vulnerabilities Database and pushes regular updates to the device, ensuring that the printer software and associated system configuration conform to the highest levels of security.

SINGLE LINE ENCODING

- ▶ Many enterprises hold sensitive and personal information securely within a protected data center. In order to comply with data protection regulations, Single Line Encoding allows for data packaged at source to be sent securely from the data center to be unpacked at its destination and used by the printer's application.

PA1300 Series Printer Models:

PA1323

- ▶ Double Sided, Smart Id Card Printer
- ▶ Double Sided, Smart Id Card Printer Kit (PA1323 / PA300YMCKO / 3633-0053 / MIFARE1K)
