

Brady Workstation CLP/GHS Labels App

workstation.bradyd.com

Easily import SDS content to quickly create CLP/GHS labels!

The Brady Workstation CLP/GHS Labels app makes aligning with the CLP Classification, Labelling & Packaging Regulation (1272/2008) and the Globally Harmonized System of Classification and Labeling of Chemicals (GHS) amazingly simple. It features easy uploading and storing of Safety Data Sheet (SDS) information and label creation capabilities.

Chemical Data Storage & CLP/GHS Label Creation

It all starts with the information on your SDS sheets. With the CLP/GHS Labels app, you can easily import, store and update the SDS data for every chemical in your plant – all in one convenient place!

Once you enter the chemical information one time, you'll never have to enter it again. With SDS data just a touch away, you can simply pick a chemical, pick a label size and print the CLP/GHS labels you need at any time.

Brady Workstation – CLP/GHS Labels App

Diamond Blackout Feature

Don't need all four diamonds? Don't sweat it! We'll take care of blacking out the unused diamonds, so no need to switch rolls or stock additional inventory if you're using one of our monochrome printers.

Pre-Populated Hazard Statements

We think label creation should be simple and convenient. That's why we offer a wide range of pre-populated precautionary and hazards statements right in the app. That way you just choose the message you want and it appears on the label automatically, saving you time deciding what the label should say. Hazard statements are categorized into four different groups: physical, health, environmental and European standard statements.

Print Your Labels

Once created, the labels can be printed on Brady's BBP™31, BBP™33, BBP™85 and GlobalMark®2 Printers.

Free Trial!

Try out the CLP/GHS Labels app today: Workstation.BradyID.com

1. Download Brady Workstation at workstation.bradyid.com

2. Add the CLP/GHS Labels app into your workstation to start your 14 day free trial!
