

Confined Space

A W A R E N E S S

Brady's Confined Space Awareness Internet based training program delivers essential knowledge to any worker who may work around confined spaces.

The hazards that exist and that are met when entering and working in a confined space are capable of causing injury, illness and death. Often accidents occur because a hazard goes unrecognized. In effect, the confined space is a hazard, and must be treated as such. When working around a confined space it is necessary to be aware of the dangers that exist in and around the confined space area.

Educate your workers to work safe!

Using Brady's Confined Space Awareness program you will be helping to educate your employees in the safe practices when working around confined spaces. In addition, the Confined Space Awareness program can be used as an introduction to confined space entry practical training.

When participating in Brady's Internet based training programs employers are ensured of consistent quality training each and every time. Employee training records are instantly downloaded to your computer and stored in database format for reference at any time. Print reports and certificates right from your desktop.

With Brady's Internet based training system implemented in your workplace, yearly training is automated and efficient. Call today for more information and for a complete list of health and safety programs offered by Brady.

Brady's Confined Space Awareness Internet based training program addresses all of the issues required to become aware of and take the appropriate precautions when working around confined spaces.
