

CODESHIELD® DISINFECTANT READY PLASTICS

Regardless of the setting, CodeShield Plastics offer 3 levels of protection to meet your needs

Molecularly dense and robust, CodeShield enables Code Reader barcode scanners to endure routine disinfection with common sanitisers.

All Plastic isn't Fantastic

CodeShield rises above innovations from some of its competitors thanks to a densely packed polymer structure that typical disinfectants can't penetrate. Unlike anti-bacterial plastics, CodeShield Plastic withstands healthcare-grade infection control protocol. Basically, users collect data, not germs.

Be on Point...

Whether it's the point of sale or point of care! The COVID-19 pandemic propelled Code Barcode Readers into high-volume stores and manufacturing facilities. Why? Because CodeShield plastics can be wiped down continually during shifts without:

- Degrading, cracking, and prematurely failing (leaving you with replacement costs).
- "Yellowing" dingy devices don't project cleanliness or a positive image .

Level Up!

CodeShield Plastics are offered in three grades: Levels 1, 2, and 3. This variety frees buying committees and key users to select the proper scanner for their firm's infection control needs without overpaying.

Levels 1–3 enable CodeShield-equipped devices to withstand three to 20 approved cleaning chemicals, making this the broadest range in the industry. But, it's about people, right? Ultimately, many operations leaders replaced devices with anti-bacterial plastics for CodeShield ones. Doing so shielded patients, customers, and employees from viruses and infectious diseases, e.g., COVID-19, C. diff (Clostridioides difficile), and MRSA.

Different Sides of the Same Shield

Level 1, 2 and 3 CodeShield Plastics are available on our handheld and handsfree barcode readers. Different levels for different styles give virtually any firm an edge in protecting users from contacttransmitted illnesses.

20 Approved Level 3 Cleaners

- Clorox® Non-Bleach Disinfecting Wipes
- 0.5% hydrogen peroxide solution
- Oxivir® Tb Wipes
- 3% hydrogen peroxide solution
- Sani-Cloth® Plus Germicidal Wipes
- 91% Isopropyl Alcohol Solution
- MetriCide® 28 Day Solution (2.5% glutaraldehyde)
- CaviWipes® Disinfecting Towelettes
- Virex® II 256 Disinfectant Cleaner
- Cidex® OPA

- Sani-Cloth® HB Germicidal Wipes
- Sani-Cloth® PDI AF3 Wipes
- Super Sani-Cloth® Wipes
- Windex® Original
- Windex® Multi-Surface Anti-Bacterial Spray
- Formula 409® Glass and Surface
- Hepacide Quat® II
- Dispatch® Wipes
- Bleach 10%
- Clorox® Bleach Disinfecting Wipes
