

Collapsible Gate Valve Lockout Devices

BradyID.com/lockout

Easy handling and lockout on the widest range of gate valve sizes

Brady's Collapsible Gate Valve Lockout Devices are a durable and versatile solution to effectively cover and secure gate valves with 3- to 18-inch diameter handles. Until now, there hasn't been a gate valve lockout cover solution for handles larger than 12 inches. These new covers allow for the lockout of a wider range of valves with the use of fewer devices. In addition, they easily rotate around valve handles to the fully engaged position, while also condensing down into a smaller, more portable size.

Key features include:

- Available in three sizes, to secure 3"-7", 7"-13" and 13"-18" diameter valve handles
- Fold into smaller sizes for easy storage on maintenance carts and in lockout kits
- Rugged, injection-molded styrene construction withstands harsh outdoor conditions
- Patent-pending design includes knock-out centers to accommodate outside screw and yoke (OS&Y) valves

Catalog #	Description	Qty
148646	Collapsible Gate Valve Lockout for 13-18" handle diameters	1
148647	Collapsible Gate Valve Lockout for 7-13" handle diameters	1
