

# Brady Workstation Mobile Text Labels App and Fluke Networks LinkWare™ Live

[www.bradyeurope.com/Fluke](http://www.bradyeurope.com/Fluke)

## Easy label creation with data integration

Easily connect your data using the Brady Workstation Mobile Text Labels app with the integrated LinkWare Live Solution from Fluke Networks® and print your labels using the BMP51 or BMP61 portable label printer. Streamline the process of creating labels on-demand while completing cable testing using a Versiv testing device.

### With the Mobile Text Labels app, you can also:

- edit the font size, type style and justification
- create numeric, alphabetic or alphanumeric label sequences
- see real-time printer details
- import data from a variety of cloud-based services
- and more!

### To use this integrated solution you will:

1. download your set data from the LinkWare Live cloud using the Brady Mobile Text Labels app
2. view and edit your data to meet your specifications
3. connect your mobile device to your printer via Wi-Fi or Bluetooth
4. print the set labels on your BMP51 or BMP61

## Complete labelling tasks with industry tested materials

Reduce downtime with our world-class label materials that are engineered to withstand the harshest industry environments for long-lasting clear identification. We produce a wide variety of custom or stock die-cut and continuous label materials that are specifically designed for use in electrical and ICT cable and component identification.
