

Smart Lockout App for LINK360® Software

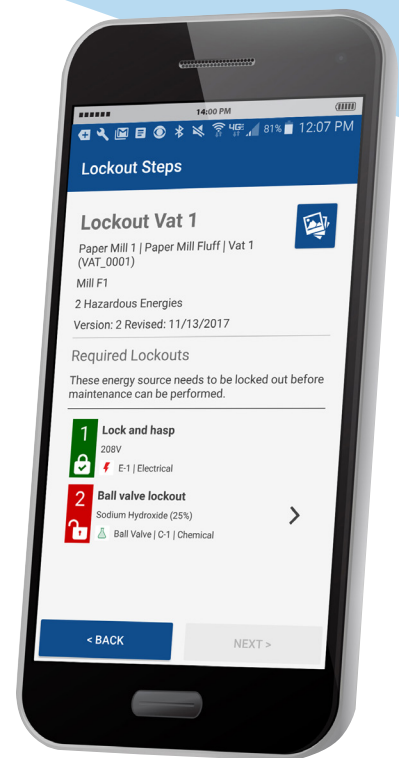

To more efficiently and effectively complete your lockout verification process, the Smart Lockout app seamlessly guides you through the steps. This tool is the next generation of lockout productivity – helping to ensure that employees use the most up-to-date procedures, verify all steps are completed and create reports quickly.

This mobile app takes your lockout program beyond paper procedures and manual processes, allowing you to:

- Access the most current procedures anytime
- Review safety procedure details anywhere
- Avoid missing a step with guided navigation
- Pick up where you left off with progress tracking
- Save time by uploading system-generated reports

To Use the Mobile App, Simply:

1. Log in using your LINK360 credentials
2. Search procedures using the hierarchy defined in LINK360 software
3. Download procedures in the mobile device
4. Review, plan, prep and perform steps to de-energize/re-energize equipment
5. Send reports back to LINK360 software to save history

Check Out What Current Users Are Saying:

“We like the simplicity and flow of the application. It was very easy to explain and use.”

“It was easy to use and provided documentation for a cross-check on the procedure use.”

“We like that both the LINK360 app and the checklist app could be used on the same device, allowing for a smooth transition between the apps.”
