BRADY

Solutions for **hazardous energy control**

LOCKOUT / TAGOUT

About
BRADY

Once you have worked with BRADY, our name will stick with you, (just like our labels) because BRADY is one of the world's leading labelling and identification specialists.

Innovative

At BRADY we continue to improve. We have many customers from all industries, and we strive to be ahead of their needs by continuing to invest in research for even more performant solutions.
By developing more user-friendly and efficient concepts, we give our thousands of customers the best in the market.

Strength

At BRADY, we believe our biggest strength is the wide range of identification and safety solutions we can offer our customers, whether it's labelling the smallest component or complete signage for an entire warehouse. We're also proud to offer many products and services - from printers, scanners and software to service contracts and on-site training - that compliment any identification job. And don't forget, our wide network of expert distributors can always offer you a tailor-made solution to meet your specific requirements.

Trust

For over a hundred years, BRADY has been connected with quality, trust and stability. We demand the best for your products and services, because we know, better than anyone, the importance of good and reliable identification. Identification looks like a small detail, but every professional knows that this kind of detail is crucial to any business.

Inform

We also have specialised dealers in your region, who can answer all your identification, safety and labelling questions, specific to your activity. They will be happy to provide you with all kinds of options and solutions with no obligation.

Lockout / Tagout

Solutions for hazardous energy control

The Brady Advantage

When it comes to identification, safety and compliance, there's a clear advantage to working with Brady. We put our customers first in everything we do.

Our goal is to give you an unrivalled customer experience. We are relentlessly committed to performance and excellence - in our products, services and people.

Our products and solutions perform in ways that others simply can't match. Our people perform in ways that regularly exceed your expectations. And our focus and discipline work toward solid, long-term performance for our customers.

In short, Brady is the company you trust when performance matters most.

Go for zero

Do not operate
without a Lockout/Tagout program

"A co-worker dies, and 160 others have a work-related accident, every 15 seconds. (International Labour Organisation, 2015)

Workplaces claim more than 2.3 million deaths per year, including 350,000 fatal accidents and close to 2 million life ending work-related diseases.

In addition, 313 million accidents happen on the job every year, 268 million of those resulting in at least 3 days absence from work. ILO estimates the cost of work accidents & professional diseases indemnities and absences to 4% of the world GDP. Workplace accidents not only impact companies (Figure 1) but also people's lives and the overall health of the available workforce. (Figure 2)

Figure 1: Economic effects of safety and health at company level

Less health and safety risks. Better opportunities for rehabilitation

Safety and health performance

Less accidents, damages, liabilities, legal costs, absenteeism medical costs

Throughout the world, companies are starting to meet the workplace safety challenge with intensive 'Go for Zero'-strategies, expressing their unwavering ambition to reduce workplace accidents. Brady, a worldwide manufacturer and supplier of Safety Solutions, supports 'Go for Zero'-strategies with a broad range of quality products, including on-site printable safety signage, custom signs, pipe markers, spill control and Lockout/Tagout.

In this brochure, you can look through our solutions for maintenance related accident prevention.
Solutions related to other activities can be found in our other safety solutions brochures.

BRADY

Why and how to implement a lockout/tagout program

Use this reference guide to gain a better understanding of Lockout/Tagout procedures. More in-depth information regarding padlocks, lockout devices and tags can be found throughout the catalogue.

Why and how to implement a
lockout/tagout program

What is lockout/tagout?

Lockout / Tagout is a planned safety procedure which involves turning off the energy supply of industrial machinery and equipment whilst maintenance work or repairs are being carried out. This procedure protects workers from the risks posed by live machinery or electricity.

LO/TO SAVES LIVES!

Why work with Brady?

Brady is the global leader in Lockout/Tagout solutions.
Brady was the first to respond to the new OSHA legislation in the U.S. in 1990, and has maintained its position as a leading Lockout solutions provider ever since. Today, Brady offers a comprehensive package for Lockout/Tagout compliance.
Increasing demand for advanced safety solutions in Europe and MEA countries has driven our R&D as well as know-how to become the best-in-class LO/TO complete solution provider.
Lockout/tagout - global best practice training movie

This instructional program is designed to inform and train organisational safety leaders, as well as employees who may be exposed to hazardous equipment energies. It will help employers to develop and improve their company's Lockout / Tagout program. It is also extremely beneficial for all employees who shut down and service equipment, instructing them how to avoid accidents and remain safe on the job.

Highly comprehensive content

The product's composition is as follows:

• The Movie
• A Quick Start Guide
• An Instructor's Guide
• An Employee Quiz

Training videos are also available on the Bradyeurope YouTube™ channel.

The Employee quiz can be used at the end of the training program. It allows to test the employee's knowledge after the training session and facilitates a discussion. A padlock engraved "LOTO saves lives" is included in the product box.

All parts are available electronically on a USB key (Quick Start is also available in a hard copy format), and accessible in 10 different languages for EMEA: English, French, German, Dutch, Spanish, Italian, Portuguese, Turkish, Polish and Russian.

833918	Lockout / Tagout – Global Best Practice Training Movie. Reduce work accidents!

Why and how to implement a
lockout/tagout program

Why implement a lockout/tagout program?

Reduced accident rates and injury costs

EU Figures show that 10 to 15% of all fatal accidents at work and 15 to 20% of all accidents are connected with maintenance. Common injuries include fractures, lacerations, amputations, burns and shocks. Due to the serious nature of many maintenance accidents, injury-related costs can be exorbitant.

Less downtime, higher productivity

A well-organised LO/TO program that includes clearly labelled energy sources, easy-to-follow procedures, and readily accessible lockout tools can greatly speed up maintenance and servicing activities. Workers can avoid time-consuming tasks such as tracing pipelines and electrical circuits in order to verify the appropriate energy control points. As a result, maintenance work is completed more efficiently, downtime is reduced and machinery is kept running at peak performance levels.

Reduced indirect costs

Accidents can have a significant impact on work scheduling and productivity at the affected job site. The unexpected start up of equipment can also cause extensive damage to the machinery itself, adding the expense of equipment repairs and replacement to the total cost involved.

Best Safety Practice

Lockout/tagout has become globally recognised as best safety practice for many industries and is a legal requirement in the US.

Brady's complete LO/TO solution

Complete attitude to effective energy control via audit, identification of energy points, selection and purchasing of proper devices, elaboration of instructions, training and implementation.

BRADY COMPLETE LO/TO SOLUTION

Efficient lockout program in 6 Steps

Follow the BEST GLOBAL PRACTICE plan for creating an efficient lockout program:

LoTo Policy	→	Machine specific procedures	→	Identify energy isolation points	→	LoTo Training	→	Proper LoTo tools	→	Substain the LoTo program

1 Create a Lockout/Tagout policy

The first step to Lockout/Tagout success is developing and documenting an equipment energy control policy. A written lockout policy document establishes and explains the elements of your Lockout/Tagout programme. It's important to take into account international standards, relevant laws, industry regulations, and your specific working environment to create a highly relevant procedure. Best practices call for a collaborative effort from all relevant organisational levels, and for an annual review that keeps the policy up-to-date.l

2 Establish machine specific procedures

Lockout procedures should be formally documented and clearly identify the equipment covered. They should detail the specific steps necessary for shutting down, isolating, blocking and securing equipment to control hazardous energy, as well as steps for the placement, try-out, removal and transfer of Lockout/ Tagout tools. Brady Safety Engineers can help create best practice machine specific lockout procedures, including photos of relevant energy isolation points.

3 Identify all energy control points

Locate and identify all energy isolation points — valves, switches, breakers and plugs — with permanently placed and standardised labels or tags. Keep in mind that these labels and tags should be consistent with the machine-specific Lockout/Tagout procedures from Step 2. Our Safety Engineers can visit you on-site to help identify all energy isolation points per machine.

Efficient lockout program in 6 Steps

Follow the BEST GLOBAL PRACTICE plan for creating an efficient lockout program:

④ Lockout/Tagout Training

Adequately train your employees, communicate processes and conduct periodic inspections to ensure your programme is running effectively. Training should not only include relevant legal requirements, but also your own programme elements, such as machine-specific procedures. Training can be diversified for 3 employee categories (OSHA, US):
- Authorised employees who perform the lockout on machinery and equipment for maintenance.
- Affected employees who use the machinery that is receiving maintenance.
- Other employees who may be in the area where a piece of equipment is receiving maintenance.

Brady offers on-site trainings and a modular Lockout/Tagout training video that can be adapted to the audience.

⑤ Provide proper Lockout/Tagout tools

When machine-specific procedures are written, and their energy isolation points are identified, the best fitting lockout tools can be selected efficiently. Brady provides a wide range of Lockout/Tagout tools and devices. Email emea_request@bradycorp.com for a free and complete Lockout/ Tagout catalogue.

⑥ Sustain the Lockout/Tagout programme

Maintain the Lockout/Tagout programme throughout the year to enhance your safety culture. Continuous improvement will enable your company to proactively address safe machine interventions.

Keep in mind all the people in your facility, recognise 3 groups with different needs of awareness degree:

Group	Description	Training need
Authorised employee →	A person who locks out or tags out machines or equipment in order to perform servicing or maintenance and identifies that equipment have a source(s) of energy that can cause injury to the employee.	→ Requires the most in-depth training about LO/TO.
Affected employee →	An employee whose job requires him/her to operate or use a machine or equipment on which servicing or maintenance is being performed under LO/TO, or whose job requires him/her to work in the area.	→ Needs to be informed about LO/TO and does not attempt to remove lockout devices.
Other employees →	Who may encounter lockout being implemented.	→ Need to know the significance of lockout, and to keep away.

▶ **Do not forget about different circumstances:**
- Shift changes
- Outside contractors & outsourced maintenance

Respecting legal requirements and technical standards

EUROPE
Directive 2009/104/EC (formerly directive 89/655/EEC of the Council from 30 November 1989) specify the minimum requirements for safety and health protection for workers using work equipment at work. Paragraph 2.14 lays down that "every piece of equipment must be fitted with clearly visible devices with which it can be separated from every energy source". Paragraph 2.15. lays down that "Work equipment must bear the warnings and markings essential to ensure the safety of workers".
EN ISO 14118 (2018-07) norm of Safety of machinery (is the successor to DIN EN 1037 2008-11) related to the equipment's safety defines the measures regarding the energy isolation of machinery and the power dissipation to prevent hazardous equipment re-energising. It assures a safe and secure intervention within a risk-prone area.

AUSTRIA
AschG – ArbeitnehmerInnenschutzgesetz – Federal Act on Occupational Health and Safety
AM-VO – Arbeitsmittelverordnung (Ordinance on Work Equipment and Tools) – Regulation of the Federal Ministry of Commerce and Labour on protection of employees while using work equipment paragraph 1, §17 (1).

FRANCE
UTE C18-510 (electrical applications): Lockout of apparatus for service and maintenance to lockout equipment is to carry out the necessary procedures to ensure that the equipment is placed and maintained in a safe position; to prevent its activation and label that the isolated equipment must not be operated. The employer must ensure that all safety procedures are strictly implemented and regularly reviewed by appropriate means. Employees must use all necessary tools to carry out maintenance.
Best practice document developed by INRS (Institut National de Recherche et de Sécurité) in November 2011: ED 6109
- Décret 2010-1016 refers to the obligations of the employers for temporary or permanent electrical installations usage
- Labour code (article R4215-10) refers to the identification of the conductors
- Décret 2010-1018 refers to the prevention of electrical risks in work environment, décret 2010-2118 refers to the operations done on electrical installations.
- Labour code (article R 4544-5): the part of the installation on which work (de-energised) is done must be identified and locked.
- Arrêté of April 26, 2012: Every operation on electrical equipment must follow the new norm NFC18-510. Article 1 says that this norm is now included into the French Code of Labour.

Respecting legal requirements and technical standards

GERMANY

BetrSichV 2015 (Ordinance on Industrial Safety and Health)
Ordinance concerning the protection of safety and health in the provision of work equipment and its use at work and maintenance processes.
Extract from BetrSichV 2015
§ 8 Protective measures in case of hazards caused by energies, start-up and stoppage
Paragraph 3: "Command devices which have an influence on the safe use of the means of work shall in particular be secured against unintended or unauthorised operation.
Paragraph 4: "Work equipment may only be intentionally put into operation. If necessary, the start-up process must be safely prevented.
§ 10 Maintenance and modification of work equipment
Paragraph 3: The employer must take all necessary measures to ensure that maintenance work can be carried out safely.
(3) to secure the working area during the maintenance work
(6) to avoid hazards caused by moving raised work equipment or parts thereof, as well as by hazardous energies or substances.
(9) Provide necessary warnings and dangers messages referring to maintenance work on the work equipment
Paragraph 4: Where, in the case of maintenance activities ... are carried out under the threat of energy, the safety of workers shall be ensured during the duration of this work by means of other appropriate measures.

ITALY

The Italian legislation (Direttiva 2001/45/CE del Parlamento europeo e del Consiglio del 27 giugno 2001 che modifica la direttiva 2009/104/EC) concerns the minimum safety and health requirements for the use of work equipment by workers at work.

SWITZERLAND

- UVG – Federal Law on Accident Insurance VUV – Regulation on the Prevention of Accidents and Occupational Diseases title 1, chapter 2, paragraph 1, art. 3; title 1, chapter 3, paragraph 2, art. 30, 31 paragraph 3, art. 37; paragraph 4, art. 43
- EKAS Guideline no. 6512 – Work Equipment

These regulations clearly stipulate that during maintenance, adjusting or cleaning of the equipment, it has to be in non-operative state and appropriate devices have to be used to ensure that, for example, a machine is not accidentally switched on.

SPAIN

The Spanish directive (REAL DECRETO 1215/1997, de 18 de julio por el que se establecen las disposiciones mínimas de seguridad y salud para la utilización por los trabajadores de los equipos de trabajo. BOE nº 188 07-08-1997) states the minimum safety and health for workers' use of work equipment.

Respecting legal requirements and technical standards

UK ONLY: BS7671:2008

In the UK the Provision of Work Equipment Regulations – Regulation 19 – Isolation from Sources of Energy states: "Every employer shall ensure, that where appropriate, work equipment is provided with suitable means to isolate it from all its sources of energy. Every employer shall take appropriate measures to ensure that reconnection of any energy source to work equipment does not expose any person using the equipment to any risk to his health or safety.

USA (OSHA - OCCUPATIONAL SAFETY & HEALTH ADMINISTRATION

OSHA regulation The Control of Hazardous Energy (Lockout / Tagout) 1910.147 states that it "requires employers to establish a program and utilise procedures for affixing appropriate lockout devices or tagout devices to energy isolating devices and to otherwise disable machines or equipment to prevent unexpected energisation, start up or release of stored energy in order to prevent injury to employees.

> ▶ **Implemented LOCKOUT/TAGOUT is the law in some EU countries and considered to be best practice in all European countries!**

ATEX STANDPOINT

The ATEX directive consists of two EU directives describing what equipment and work environment is necessary to maintain safety in spaces with a potentially explosive atmosphere.

This ATEX directive was published on Saturday 29 March 2014, under the reference : Directive 2014/34/EU of the European Parliament and of the Council of 26 February 2014 on the harmonisation of the laws of the Member States relating to equipment and protective systems intended for use in potentially explosive atmospheres (recast) (Text with EEA relevance) - Official Journal of the European Union L 96 from 29/03/2014.

Areas classified into zones (0, 1, 2 for gas-vapor-mist and 20, 21, 22 for dust) must be protected from effective sources of ignition.[1] Equipment and protective systems intended to be used in zoned areas must meet the requirements of the directive. Zone 0 and 20 require Category 1 marked equipment, zone 1 and 21 require Category 2 marked equipment and zone 2 and 22 require Category 3 marked equipment. Zone 0 and 20 are the zones with the highest risk of an explosive atmosphere being present.

Equipment in use before July 2003 is allowed to be used indefinitely provided a risk assessment shows it is safe to do so.

The aim of Directive 1999/92/EU - on minimum requirements for improving the safety and health protection of workers potentially at risk from explosive atmospheres.

This Directive requires employers to introduce technical and/or organisational measures which (a) prevent the formation of explosive atmospheres and/or (b) prevent the ignition of explosive atmospheres and/or (c) reduce the effects of an explosion so that there is no longer a risk to workers.

Several of Brady's lockout devices and padlocks meet the ATEX standpoint. These are highlighted in the brochure.

Safety services

Lockout/Tagout is a crucial safety measure that ensures the protection of workers who operate, service, and maintain machinery and equipment. Lockout/Tagout is successful when approached as a comprehensive safety program. A successful lockout tagout program should encompass the entire safety picture, including locks, tags, and devices, as well as program documentation, machine-specific lockout procedures, employee training, periodic inspections, and a plan to sustain the program.

As a global player and expert in Lockout/Tagout, Brady provides A-Z support for industries worldwide. Our offer includes services for designing and maintenance best practise Lockout/Tagout programme. Brady engineers have created thousands of lockout procedures for hundreds of companies in various industries. Get them to help to implement best-in-class, company-approved, custom Lockout/Tagout safety procedures as well.

Our safety engineers rely on legislation, shared experience from thousands of Lockout/Tagout implementations, and a worldwide knowledge base to get your policy and procedures right, and on par with top safety programmes in the world. They offer these services:

- Lockout/Tagout Gap Analysis: identify gaps in your Lockout/Tagout policy

- Lockout/Tagout Discovery: gain insight in your site's Lockout/Tagout requirements

- Turnkey Lockout Programme: world-class Lockout/Tagout for your entire site

- Assist Lockout Programme: world-class Lockout/Tagout for a set of machines

- Virtual LINK360 Programme: create your own Lockout/Tagout programme

- Personalised Lockout/Tagout tool offer: the right tools for your facility

- Lockout procedure audit: sustain your lockout programme

- Lockout/Tagout training: create a safety culture

Our Safety Engineers have implemented Lockout/Tagout at industrial facilities both large and small. As a leading global Lockout/Tagout solution provider, Brady brings the world's best practices to your facility.

Safety Software

Discover the LINK360™ software modules

Pre-defined templates and the ability to easily add users from any site in your company, create a comprehensive yet easy to use solution to manage your Lockout/Tagout, Reliability and Confined Space activities.

The **lockout/tagout Module** focuses on creating and maintaining a safe working environment with tools to help lock out hazardous energy sources. By accessing this module users can:

- Manage lockout/tagout programmes to perform maintenance on machinery.
- Create visually instructive safety procedures, tags, and energy source labels for printing.
- Meet regulatory requirements and industry standards on lockout of hazardous energy sources.
- Free mobile app for iOS or Android, mobile phones and tablets.

The **Reliability Module** provides tools to streamline regular equipment checks.
By accessing this module users can:

- Manage the creation of visually instructive maintenance procedures that assist operators, engineers, and technicians in maintaining machine equipment performance levels.
- Control access to who may view, edit, and create templates and procedures.
- Free mobile app for iOS or Android, mobile phones and tablets.

The **Confined Spaces Module** allows users to compile assessments, create permits, and track history for confined space permitting.

- Identify confined space hazards and classify a space as a 'permit required' confined space.
- Entrants are able to fill out permission requests online for approval.
- Meet regulatory requirements and industry standards on lockout of hazardous energy sources.
- Permission history is logged for future audits and reporting.

LINK360 cloud-based answers the most pressing visual information needs. Faced with the task of handling visual information across multiple locations, companies need a way to take the management of equipment visuals to the next level by closing the loop on scalability and sustainability.

1. Design   *2. Post*   *3. Monitor*

Effective control of hazardous energy

Effective control of hazardous energy

To ensure de-energisation and isolation of all potentially hazardous energies that supply production or facility operating equipment, so that the equipment can be safely serviced or maintained.

Energy isolating device – a mechanical device that, when utilised or activated, physically prevents the transmission or release of energy, including

- a manually operated electrical circuit breaker
- a disconnect switch
- a gate / ball / plug / butterfly shut-off valve

Hazardous energies where LO/TO is the ideal means of control:

- Electrical
- Mechanical
- Pneumatic
- Hydraulic
- Liquid & gaseous chemicals
- Thermal
- Hot surfaces & substances
- Gravitational
- Overhead objects or equipment that may fall & crush
- Other stored energy
- Flywheel stopped mid-motion, residual electrical that needs to be bled

Remember that production, plant or facility equipment commonly have **more than 2 types of energy present.**

Padlocks

Brady's high quality padlocks are ideally suited for lockout tagout applications.

Find the best padlock for your needs

With so many options available, choosing the right padlock for your job can be confusing. Let us help you get the padlock that fits your needs.

Body material options

Nylon
Non-conductive

Ideal for electrical applications and enclosures

Easy to carry

Lightweight with ribbed design for easy gripping

Key retaining security*

Key releases only on lock closure

Most common

Preferred for most indoor lockout applications

Aluminium
Long-lasting

Anodised, corrosion-resistant finish provides extended life

Increased security

Durable construction for better tamper resistance

Corrosion resistant

Resilient against harsh environments, such as food, oil and chemical

Versatile usage

Great for indoor and outdoor use

Steel
Heavy-duty

Laminated steel body withstands severe physical abuse

Maximum corrosion protection

Individual coated steel plates protects against extreme corrosion

Key retaining security

Key releases only on lock closure

Highest durability

High performance in extreme outdoor and harsh environments

*Not all nylon padlocks have a key retaining feature

Body size options

Compact
Material availability

Nylon, aluminium

Ideal usage

Everyday applications, small spaces and circuit breakers
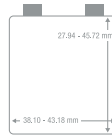

Standard

Padlock types

SafeKey Lockout Padlocks

Advanced Key Security
Patent-pending locking mechanism includes six precision steel tumbler blades

More Unique Key Possibilities
Ideal for large organisations using hundreds to thousands of locks

Easy Operation
Extra smooth key insertion and removal – even when wearing gloves!

Long-lasting
Linear, low-friction lock mechanism helps maintain key integrity

Traditional Padlocks

Classic Padlock Design
Traditional jagged key design and pin tumbler lock mechanism

Fewer Key Combinations
Ideal for small work groups and facilities with fewer energy isolation points

Multi-purpose Solution
Flexible cable locks available for tight spaces and simultaneous lockout points

More Material Options
Available in non-conductive nylon, aluminum and laminated steel lock bodies

Keying options

Standard options

Keyed Different (KD) – Each lock is opened by its own unique key. Perfect for simple lockout applications and a manageable number of energy isolation points.

Keyed Alike (KA) – Each lock in the group can be opened with the same key. Easy to find the right key, reduces number of keys needed to carry. Ideal for individuals or trades responsible for multiple machines or isolation points.

Custom options

Master Keyed (MK) – Each grouping of locks (whether keyed alike or different) can be opened with a master key. Useful for larger, complex systems when supervisory access may be required

Grand Master Keyed (GMK) – The grand master key can open all locks grouped into two or more master keyed systems. Useful for larger, complex systems where supervisory or managerial access to all locks in the facility is needed.

ULTIMATE

By printing (PrintFace)*

Print a face or any other personalisation in high resolution directly on the padlock, because safety is personal.

The print resists abrasion, chemicals and UV-radiation and can be applied both to the front and back of the padlock.

*PrintFace is exclusively available on SafeKey padlocks with custom keying or standard keying option.

ADVANCED

By engraving

Brady offers reliable laser engraving for all our Lockout/Tagout padlocks. Ideal in abrasive or heavy industrial contexts.

STANDARD

By labelling

Use the labels included with your Lockout/Tagout padlocks. It can include the name of its owner and a phone number or any other information.

Find out everything you need to know about personalising your padlocks on

www.bradyeurope.com/padlockpersonalisation

BRADY

Made like no other

In the last 50 years we've seen a manufacturing technology boom matched only by the industrial revolution. In fact, industrial maintenance employment has grown by more than 20% in the last decade.* With these advances, lockout needs have grown. Choose SafeKey Lockout Padlocks, exclusively from Brady, to lock in to ultimate key precision and advanced key security for years to come.

With this innovatively designed padlock you get up to **700% more unique key possibilities than a standard safety padlock**, without sacrificing a secure lockout. It's all in the forward-thinking design of the locking mechanism and unique key blade that gives you more precision and control in your lockout program. With that level of precision, you're covered from your simple to highly complex lockout needs. You also get:

• easy operation with extra smooth key insertion and removal – even when wearing gloves!
• fast identification with the colour-matched key and lock body
• years of use with the low-friction locking mechanism that helps maintain key integrity
• excellent durability in every industrial environment

9 different colour options available

*U.S. Bureau of Labor Statistics.
(2019, January 22). Occupational Employment Statistics. https://www.bls.gov/oes/tables.htm

See the difference in the details

Product innovations are only as good as the benefits they provide. See the difference you get with the patent-pending SafeKey Lockout Padlocks:

Added safety with non-conductive ball bearings and driver

Enhanced security with two side-locking bars

Ribbed design for easy handling (nylon locks only)

More than 100,000 key codes made possible with linear, low-friction lock mechanism

Extra durability in industrial environments with one-piece body design

Easy operation with smooth key design and precision steel tumbler blades

Fast identification with colour-matched lock and key

Traditional safety padlocks

- Pin tumbler lock mechanism
- Jagged key design
- Up to 15,000 key codes

See the new SafeKey Lockout Padlocks in action

BRADY

SafeKey nylon padlocks with steel shackle

- Lightweight non-sparking nylon body with a durable steel shackle
- Non-conductive locking mechanism
- Ribbed design for safe handling
- Ideal for general lockout applications
- Key-retaining lock feature

1 key supplied for each padlock. Custom keying options available.
Supplied with padlock labels in English, French and Spanish.
Engraving on front, back, sides & key.

BRADY

Traditional Nylon Padlocks

With a variety of different shackle sizes, materials and colours!

- Comes standard with hardened steel shackle for enhanced security or with nylon shackle to cut off the electrical current from the shackle to the key
- Aluminium shackle available on request for a significant reduction in weight
- Available in 10 different colours
- Key retaining system (Key won't release until padlock shackle is correctly closed)
- Optional laser engraving*

Locks are supplied keyed different. 1 key supplied with each padlock.
Custom keying options available.
Supplied with padlock labels in English/French for Standard & Nylon and English/French and English/Spanish for Long Body.

All these padlocks meet the ATEX Equipment Directive

PrintFace

Print a face or any other personalisation in high resolution directly on the padlock, because safety is personal.

SafeKey nylon compact padlocks with aluminium shackle

- Extremely compact and lightweight design
- Non-conductive and non-sparking nylon body
- Non-conductive locking mechanism
- Ideal for electrical applications and small spaces
- Ribbed design for safe handling
- For electrical contractors, maintenance and electricians

1 key supplied for each padlock. Custom keying options available.
Supplied with padlock labels in English, French and Spanish.
Engraving on front, back, sides & key.

All these padlocks meet the ATEX Equipment Directive

Traditional Nylon Compact Padlocks
Compact & Lightweight padlocks - easy to use for effective energy control!

- Non-conductive nylon body and aluminium shackle
- Minimum weight for padlock is only 40 g
- Key retaining system
- Maximum Operation Temperature 120 °C
- Colour coding allows for easy identification of Lockout teams during maintenance programmes
- Small shackle diameter ideal for lockout ready equipment with 5 mm holes
- Optional Laser Engraving on front, back & sides

Locks are supplied keyed different. 1 key supplied with each padlock.
Custom keying options available. Supplied with Padlock labels in English/French.

The compact safety padlock is perfect for small space applications and where lightweight and easy to carry locks are needed. For even more durable applications, please refer to Brady's range of padlocks with 6.50 mm diam shackles for more durability.

Safety Security Padlocks

Nylon encased aluminium body with nylon encased steel shackle

- Solid aluminium core with steel shackle for best physical strength
- Body and shackle insulated against electric shock
- NANO PROTECT™ shackle for superior corrosion resistance
- Intrinsically safe
- Automatic locking for user convenience
- Compact and lightweight
- High precision 6-pin cylinder for better tamper-resistance
- Long Body version available on request (bilingual labelling)
- Key retaining system (Key won't release until padlock shackle is correctly closed, non-key retaining available upon request)
- Optional Engraving on front, back & sides

Locks are supplied keyed different. 1 key supplied with each padlock.
Custom keying options available.
Supplied with Padlock labels in English/French/Spanish.

Consult the technical datasheet LOTO-73 on bradyeurope.com/tds

Brass Padlocks

Locks that will never rust

- Solid brass body and shackle
- Spark resistant ideal for use in flammable environments
- Corrosion resistant
- 6-pin cylinder offers more unique key cuts, better tamper-resistance
- Locks protected by coloured vinyl sheaths
- Non-key retaining, key retaining upon request (Key won't release until padlock shackle is correctly closed)
- Optional Engraving on bottom & key

Locks are supplied keyed different. Two keys supplied with each padlock.
Custom keying options available.

Traditional Full Aluminium Padlocks

Manufactured with solid aluminum body and shackle, our padlocks are amazingly lightweight and easy to use

- Solid anodised aluminium body
- Supplied with aluminium shackle
- Hardened steel or stainless steel shackle available on request
- Corrosion resistance
- Optional Engraving on front, back, sides, bottom & key
- Lock labels sold separately. See page 38
- Non-key retaining, key retaining upon request
  (Key won't release until padlock shackle is correctly closed)

Padlocks are supplied keyed different.
2 keys supplied with each lock, NOT key retaining.
Custom keying and charting is available.

Consult the technical datasheet LOTO-10 on bradyeurope.com/tds

**BRADY**

Traditional Aluminium Compact Padlocks
Lightweight and easy to use, ideal for small spaces

- Solid anodised aluminium body
- Supplied with aluminium shackle
- Corrosion resistance
- Engraving on front, back & sides

Padlocks are supplied keyed different. 1 key supplied with each lock.
Custom keying and charting is available.

▶ The compact aluminium padlock is perfect for small space applications and where lightweight and easy to carry locks are needed. For even more durable applications, please refer to Brady's range of padlocks with 6.50 mm diameter shackles for more durability.

Laminated Steel Padlocks

Reinforced laminated steel withstands severe physical abuse and hardened steel shackle is difficult to cut.

- Body plates individually coated for superior rust protection
- 5-pin cylinder offers more unique key cuts, better tamper-resistance than conventional 4-pin locks
- Coloured bumpers supplied for identification and protection
- Key retaining system (Key won't release until padlock shackle is closed)
- Optional Engraving on bottom & key
- Lock labels sold separately. See page 38

Padlocks are supplied keyed different. 1 key supplied with each lock.
Custom keying and charting is available.

Brady - your complete work safety solution provider

Find out more about safety products from our extensive portfolio. Visit our websites or contact your nearest Brady representative.

Visual Tagging Solutions

Provide essential records of the safe condition of all your site equipment and scaffolding.

• Simple to implement
• Easy for workers to understand
• Specially designed for rough environments
• Highly visible

Safety Signs - Important information at the point of need

We offer more than 8,000 different signs for safety, maintenance and facility identification.

• Designed to withstand even the harshest industrial environments
• Bright colours, bold text and intuitive pictograms
• Compliant with the latest standards and regulations
• Highly visible and easy to understand communication

Pipe Markers - Easily identify pipe content and flow direction

The correct identification of pipes ensures a better insight into a building's structure. Accidents, injuries and damage can be prevented.

Sorbents - Smart spill control

Clean, fast and safe removal of oil, water and chemicals spills.

• Adsorbs 10-25 times its own weight within a few seconds
• Environmentally friendly
• Spend less time cleaning

Lock boxes and padlock centres

Brady offers a range of group lock boxes which are ideal when multiple authorised employees are involved with the equipment servicing.
There are also several solutions available for efficient padlock storage.

SAFETY REDBOX™ group lockout box

Wall-mountable group lock box with quick-release system for great portability.

- Comes complete with convenient wall mounting bracket:
  - For storage, display and lockout event readiness
  - Quick release feature lets you carry SAFETY REDBOX™ to the point of need
  - SAFETY REDBOX™ can also be locked in place during lockout events
  - Cover is hinged lengthwise on the box for convenient opening and access even when wall-mounted

- Devices needed for specific equipment lockout needs can be stored directly in the box
- Convenient push button latching mechanism to keep the cover shut
- Internal slide button to secure the SAFETY REDBOX to the wall bracket
- Accepts up to 12 workers safety padlocks. Stays locked until all are removed
- Can hold up to 40 padlocks if not attached to the wall
- Made of heavy duty steel, powder-coated for extra rust resistance
- Designed to withstand a wide range of environmental conditions

Order Reference	Description	Colour	Height (mm)	Width (mm)	Depth (mm)	Max number of padlocks applied	Max. Number of Padlocks Stored	Quantity
145579	Safety Redbox Group Lockout Box - Red	Red	154.90	236.22	91.44	12	12	1
145580	Safety Redbox Group Lockout Box - Yellow	Yellow	154.90	236.22	91.44	12	12	1
307035	Additonal Bracket for Safety REDBOX Group Lockout Box	Red	40.00	174.00	-			1

 Consult the technical datasheet LOTO-76 on bradyeurope.com/tds

Group lock box

For group lockout situations involving a large number of workers and equipment.

- After machine or process is locked out, the key or keys of the machine are placed in a lock box. Each authorised work team member places a personal lock or tagout device in the group lock box.
- Ensures that no single employee has access to the box unless ALL employees have removed their locks or tags

Order Reference	Description	Colour	Height (mm)	Width (mm)	Depth (mm)	Max number of padlocks applied	Max. Number of Padlocks Stored	Quantity

26 Group Lock Box

The 26 Group Lock Box provides the ultimate in simplicity, storage and security for large group-lockout scenarios.

- Up to 26+1 workers can lock on per box
- Easy to wall-mount with button mount holes
- Clear viewing panel gives you a clear view of equipment
- Centre-hanging ops lock identifies the lockout coordinator or shift manager
- Locking tabs fully secure viewing panel and prevent key removal, regardless of lock point in use
- 11 hooks store up to three 38.10 mm or 76.20 mm shackle padlocks and keys

Order Reference	Description	Material	Colour	Height (mm)	Width (mm)	Depth (mm)	Quantity

Enclosed padlock storage modules

Provides safe storage and controls access to padlocks.

- Constructed of plastic with lockable, transparent acrylic doors
- Each metal hook can hold 2 locks
- Holds up to 40 padlocks
- Padlocks sold separately

Order Reference	Description	Colour	Height (mm)	Width (mm)	Depth (mm)	Quantity
065241	Enclosed Padlock Storage Modules	White	762.00	381.00	88.90	1

Padlock control centre

- Each nickel coated metal hook is large enough to hold two locks (not included)
- Two KD keys provided for cabinet lock

Order Reference	Description	Material	Colour	Height (mm)	Width (mm)	Depth (mm)	Quantity
800118	Padlock Control Centre - 18 hooks	Powder-coated Steel	Red	431.80	361.95	50.80	1
800119	Padlock Control Centre - 8 hooks	Powder-coated Steel	Red	304.80	254.00	50.80	1

Combined lockout & lock box station

- Powder-coated metal yellow cabinet
- Lockout safety tips printed on inside of door
- Lock box attaches to bottom of cabinet, accomodates 8-10 locks (depending on size)
- Comes with one adjustable shelf (extra shelves available)
- Lockout cabinet is capable of being locked closed and can easily be wall mounted using pre-drilled holes in back
- Cabinet dimensions: (H) 406 x (W) 355 x (D) 152 mm
- Lock box dimensions: (H) 152 x (W) 381 x (D) 76 mm

Permit Control Stations
Find the option that's right for your facility

We've got the options that are right for you — from slim and portable lock boxes to contractor-specific and more, all paired with the versatile, lightweight Permit Display Case. Select the station that's right for you.

26 Group Lock Box Permit Control Station

- Ideal for your large group lockout scenarios where keeping things centralised is most important
- Up to 26 workers can lock on per lock box
- The ultimate in simplicity, storage and security
- Clear door gives you a clear view into everything you need
- Permit Display Case keeps documentation close and easily viewable

Order Reference	Description
152731	Permit Control Station with 26 Group Lock Box

SlimView™ Permit Control Station

- Ideal for mid-size group lockout projects where mobility is key
- Rugged steel body and polycarbonate door stand up to all of your toughest jobs
- Convenient storage for up to 12 padlocks with built-in padlock and key hangers
- Easy to wall mount with button mount holes
- Clear door gives you clear view into everything you need
- Permit Display Case keeps documentation close and easily viewable

Order Reference	Description
152730	Permit Control Station with Slimview Group Lock Box

Ultra-Compact Lock Box Permit Control Station

- Ideal for smaller group lockout tasks and areas where space may be limited
- Wall-mountable and detachable
- Compact size lets it fit easily into a toolbox, bag or the palm of your hand
- Up to 12 workers can lock on per box
- Hinged transparent cover for easy viewing of contents inside
- Permit Display Case keeps documentation close and easily viewable

Order Reference	Description
152732	Permit Control Station with Ultra-Compact Lock Box

Permit Display Case
Protect and display permits, P&IDs, lockout checklists and maintenance paperwork during lockout tagout.

- Water- and dust-resistant — Keep the elements at bay with a durable design
- Flexible — Case or clipboard or both remove easily
- Compliant — Implement this best practice when it comes to group lockouts across many industries
- Best practice solution for group lockouts, can hold 25 sheets of paper – DIN A4 or Letter format

Order Reference	Description	Material	Height (mm)	Width (mm)	Depth (mm)	Quantity
151736	Permit Display Case	Plastic	431.80	247.65	38.10	1

BRADY

Lockout devices

Brady offers a comprehensive line of Lockout devices for both electrical and mechanical risk lockout.

All purpose cable lockout

The ergonomic, hand-fitted body makes it easy to tighten the cable. Can be used to lock out valves, disconnect switches, circuit breakers and more.

- Locks out multiple control points with a single device = reduced equipment costs
- Interchangeable cables, select the best type suited for the job
- High portability, cable is fixed in device which prevents loose ends from causing a hazard when in use
- Body withstands chemicals and corrosion
- 4 padlocks can be applied
- Material: ABS Plastic/Glass-filled Nylon

SAFELEX™ universal cable lockout device

Secure multiple energy disconnects with versatile group lockout hasp.

- Safety hasp-shaped body clearly identifies the equipment lockout application
- Lightweight for easy handling, carrying, operation and storage
- Versatile to lock out multiple electrical or valve energy isolation points
- Effectively lock out diverse shutoff configurations
- Complete the lockout by securing 1 to 6 safety padlocks to the locking body
- Cable can be tightened to remove slack even when locked
- Designed to withstand a wide range of environmental conditions

BRADY
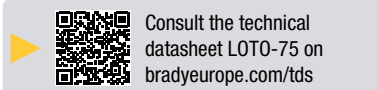

No-Handle Valve Lockout with Cable

No handle, no problem – bring the convenience of cable lockouts to handle-off ball, gate and pneumatic valves with the versatile No-Handle Valve Lockout with Cable.

- Goes on easy – just place cap, thread cable, close door, pull tight and apply padlock.
- Stays on securely – tough plastic cam wheels hold cable tight and closable protective cam door prevents loosening or tampering.
- Cable can be pulled tight, but never loosened, after cam door is closed.
- Two interchangeable rubber bases ensure a snug fit to further prevent tampering.
- 0.91 m sheathed metal cable stands up to heavy use and abuse.
- Four lock holes, including a hasp-compatible bottom hole, provide secure lock points for multiple workers.

Order Reference	Description	Diameter (mm)	Depth (mm)	Max. Shackle Diameter (mm)	Min. Shackle Clearance (mm)	Quantity
175644	No-Handle Valve Lockout with Cable	56.90	125.98	7.11	4.57	1

Original cable lockout

Brady's original, patented cable lockout device is perfect for your difficult lockout situations such as large gate valves or oversized devices.

- Simply squeeze device to tighten cable, insert your padlock to secure the handle and you're done!
- Body is made of impact modified nylon
- Available in several colours
- Comes with galvanised steel cable (non-coated)

Order Reference	Description	Colour	Height (mm)	Width (mm)	Cable Length (m)	Cable Diameter (mm)	Quantity
045191	Original Cable Lockout	● Blue	165.10	76.20	1.83	3.18	1
045192	Original Cable Lockout	● Yellow	165.10	76.20	1.83	3.18	1

Mini cable lockout

Fits in the palm of your hand and is easily stowed away in your toolbox! One device for both electrical and mechanical lockout applications saves time and money.

- Locks out valves as well as disconnected switches and circuit breakers
- Cable stored internally: works just like a tape measure, prevents cable from getting tangled
- Push-button self-winding mechanism automatically holds cable tight
- Comes with vinyl-coated steel cable or non-conductive nylon cable
- The sheathed metal cable provides extra strength for getting a tight fit on valves and levers
- Superior chemical, corrosion and temperature resistance
- 6 Padlocks can be applied

Consult the technical datasheet LOTO-38 on bradyeurope.com/tds

Order Reference	Description	Diameter (mm)	Depth (mm)	Max. Shackle Diameter (mm)	Min. Shackle Clearance (mm)	Cable Length (m)	Cable Diameter (mm)	Quantity

*This product meets the ATEX Equipment Directive.

Clamping Cable Lockout

Conquer tough or tight spaces and the widest variety of ball, gate and butterfly valves with the innovatively easy Clamping Cable Lockout.

- Innovative design puts maximum options for a fixed counterpoint in play, including the immediate valve pipe
- Familiar quick-release trigger clamp with ergonomic grip allows for easy one-handed operation
- Goes on easy – just squeeze clamp, thread cable, close door, pull tight and apply padlock
- Stays on securely – cam wheels grip cable securely, closable cam door prevents cable loosening or tampering, and panel door arm prevents clamp releasing
- Cable can be pulled tight, but never loosened, after cam door is closed
- Includes interchangeable durable steel or scratch-minimising rubber jaws
- Four lock holes, including a hasp-compatible bottom hole, provide secure lock points for multiple workers

Spin Cable Lockout

Effectively lock out many types of difficult-to-secure isolation points, including valves, handles and oversized devices, with this versatile cable lockout solution.

- Can be stored with the machine or at the point of need without cluttering space thanks to its small footprint (Ø 55.12 mm)
- Extremely adaptable functionality means this one device can take the place of multiple application-specific devices, saving time and storage space
- Three colours available to help differentiate isolation points, energy or equipment in your facility

BRADY

Scissor-Lok lockout device

Locks out multiple gate valves simultaneously. Secures power cords, freestanding equipment, tanks, cylinders or safety guards.

- Made of heavy-duty chemical resistant nylon
- Available with vinyl coated cable
- 3 padlocks can be applied. When using own cable, the outside diameter must be 4.76 mm or less

The cable and device can be combined in several ways (see examples).

Order Reference	Description	Cable Length (m)	Colour	Max. Shackle Diameter (mm)	Min. Shackle Clearance (mm)	Quantity
236921	Scissor Lok Device with Cable	0.91	Yellow	7.00	19.05	1

Brady cable lockout device

Locks out gate valves, gas cylinders, electrical devices and more!

- Comes with steel cable and a unique hasp lockout device
- 6 padlocks can be applied
- Service temperature from -20 °C to 80 °C

131064	1.22 m	4.57	Steel	Red	1

Universal valve lockout

The universal lockout device is a modular system which enables you to lock out valves of different types and sizes. No other device offers such flexibility and security. There are two sizes available - large and small.

- Modular system makes your investment economical and flexible
- Can be used to lock out large levers, T-handles and other hard-to-secure mechanical devices
- Open-ended clamp fits over closed rings and wide handles
- Locks out valves in open and closed positions
- Made from glass filled nylon for rugged durability, chemical and corrosion resistant
- 2 padlocks can be applied

Consult the technical datasheet LOTO-24 on bradyeurope.com/tds

*This product meets the ATEX Equipment Directive.

The modular construction of the Universal Lockout allows the user to add various accessories to make the device suitable for a range of valves. Simply disassemble the device and slot in the relevant accessory.

Optional blocking arm(s) can be added to make device suitable for ball valves in closed, open or partially open positions

Watch the video

Cable attachment can be added to make device suitable for locking off gate valves.

Clamp attaches to butterfly valve lever, preventing trigger handle from being squeezed. Valve cannot be repositioned

Use blocking arm to lock out quarter-turn ball valves

Use cable attachment to lock out gate valves

Use two blocking arms to lockout 3-, 4- or 5-way valves, or to lock valves in the throttled position for operational control

BRADY

Perma-mount™ ball valve lockout

These Lockout Devices keep your critical valves ready for correct lockout. Retrofit lockout devices stay permanently in place at the point of need.

- Eliminate the need to choose and carry the correct devices for each lockout event
- Securely retain the operating handle in the 90° fully-closed position
- Two sizes fit the full range of 1 to 10 cm diameter ball valves
- Designed to withstand a wide range of environmental conditions

Consult the technical datasheet LOTO-74 on bradyeurope.com/tds

Ball valve lockout

Versatile and easy-to-use device. The two halves of the device encompass the ball valve lever to secure it from inadvertent activation of the valve.

- Small device: locks out pipes from 12.70 - 31.75 mm in open and 12.70 - 63.50 mm closed position.
- Large device: locks out pipes 50.80 to 203.20 mm
- Versatile and easy-to-use
- Made from Ultra-tough Polypropylene
- Service temperature from -20 °C to 80 °C

T-handle Ball Valve Lockout

This single piece lockout device has an adjustable design that provides a secure fit when locking out T-handle ball valves on PVC pipes.

- Fits most T-handle valves on PVC pipes 12.70 to 50.80 mm in diameter
- Exclusive design features adjustable slides to ensure proper fit
- Easy to apply, lock and store

Order Reference	Description	Material	Size valve lever (mm)	Fits Pipe Sizes (mm)	Max. Shackle Diameter (mm)	Min. Shackle Clearance (mm)	Quantity

Standard gate valve lockout

The easiest device that fits your gate valve.

- Locks out gate valves with different hand wheel diameters
- Made of durable polypropylene – superior impact & chemical resistance
- Withstands temperatures from -40 °C to 150 °C
- Available in several sizes and colours
- Colours allow a coding. Transparency allows instant visibility on the valve colour and status.
- Padlock can be applied

Comes with danger labels in English, Spanish and French
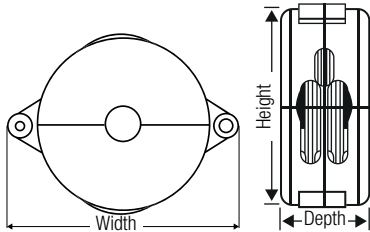

For the transparent device, consult the technical datasheet LOTO-78 on bradyeurope.com/tds

*This product meets the ATEX Equipment Directive.

For the coloured device, consult the technical datasheet LOTO-7 on bradyeurope.com/tds

Why use different colours

- Valves in open or closed position: Red = open / Green = closed
- Indicate risk levels: Red = high risk / Blue = low risk
- Indicate substances flowing through a valve: Yellow = gas / Green = water
- Indicate different maintenance teams: Red = electricians / Blue = mechanics

Collapsible gate valve lockouts

Safely lock out gate valves from 76 up to 457 mm with the collapsible gate valve lockout.

Brady's collapsible gate valve design provides secure lockout for a wider range of valves, with the use of fewer devices. These covers easily rotate around valve handles to the fully engaged position, while also folding into smaller sizes for easy storage on maintenance carts and in lockout kits.

- Rugged, injection moulded styrene construction that can withstand harsh outdoor conditions
- Up to two padlocks can be attached directly on the collapsible gate valve lockout, and even more padlocks can be added to safeguard larger maintenance teams by using Brady's Lockout/Tagout safety hasp
- Easy to apply: rotates around valves and fully covers them to make them inoperable
- Easy to store and carry: folds to 1/3 of its full size
- Flexible: 3 size variations can lock valves ranging from 76 mm up to 457 mm
- Withstands temperatures from -40 °C to +100 °C
- Unique knockout centre accommodates OS & Y or "rising stem" valves

Comes with danger labels in English, Spanish and French

Brady Collapsible Gate Valve Lockouts for 330 - 457 mm diam.

Brady Collapsible Gate Valve Lockouts for 178 - 330 mm diam.

Brady Collapsible Gate Valve Lockouts for 76 - 178 mm diam.

Adjustable gate valve lockout

One device for most gate valves!
It replaces 3 conventional gate valve lockouts to reduce your costs.

- Adjusts to fit gate valves from 2.5 to 16.5 cm
- Durable polypropylene
- Resistant to extreme temperature changes from -20 °C to 80 °C
- 3 padlocks can be applied

BRADY

Brady butterfly valve lockout

Ideal to lock a butterfly valve in the OFF position

- Can be used to lock a butterfly valve in the OFF position by clamping down on the handle so that it may not be engaged or moved
- Available in two sizes

Order Reference	Description	Specification	Colour	Quantity
121504	Butterfly Valve Lockout - Small	For valve handle thicknesses of 3.2 mm to 63.5 mm	Red	1
121505	Butterfly Valve Lockout - Large	For valve handle thicknesses of 50.8 mm to 102 mm	Red	1

Consult the technical datasheet LOTO-71 on bradyeurope.com/tds

Universal valve lockout

Use the universal valve lockout for locking out butterfly valves!

- The clamp attaches to the butterfly valve lever, preventing the trigger handle from being squeezed
- The valve cannot be repositioned
- Rugged durability, chemical and corrosion resistance
- 2 padlocks can be applied

Order Reference	Description	Colour	Max. Shackle Diameter (mm)	Min. Shackle Clearance (mm)	Max. Valve Handle Width (mm)	Max. Handle Thickness (mm)	Quantity
050899	Large Universal Valve Lockout Base Clamping Unit	Red	9.91	20.00	40.64	27.94	1
050924	Small Universal Valve Lockout Base Clamping Unit	Red	9.91	20.00	25.40	15.24	1

Butterfly valve lockout

Created to secure your butterfly valve efficiently!

- Made of strong polypropylene plastic
- Fully dielectric (non-conductive)
- Highly resistant to cracking and abrasion
- Highly resistant to solvents and other chemical products
- 2 padlocks can be applied

Order Reference	Description	Specification	Colour	Max. Shackle Diameter (mm)	Height (mm)	Depth (mm)	Width (mm)	Quantity
49303	Butterfly Valve Lockout	For valve handle thicknesses of 19.05 - 50.80 mm	Red	7.16	304.80	69.85	101.60	1

Pull handle butterfly valve lockout

Stop using ill-fitting, incorrect or unwieldy two-piece devices to lock out your pull handle valves. Get a safer solution that fits better and stays in place – the Pull-handle Butterfly Valve Lockout.

- Exclusive, anti-pivot lockout device fits the full range of pull handle valve sizes, from 12.70 mm to 203.80 mm diameter
- A convenient, one-piece design that stays together whether in use or in storage
- Holds up to four worker padlocks
- Secures the valve handle in any desired position, from fully closed, to partially or fully open

Order Reference	Description	Colour	Max. Shackle Diameter (mm)	Height (mm)	Width (mm)	Depth (mm)	Quantity
170220	Pull Handle Butterfly Valve Lockout	Red	8.00	217.50	53.80	97.10	1

Consult the technical datasheet LOTO-112 on bradyeurope.com/tds

Pipe blind lockout

Safe blind lockout for the widest range of pipes

The pipe blind lockout device can be applied to the widest range of pipes to easily and temporarily lock pipe blinds in place. With the pipe blind lockout, users can avoid the release of gas, steam and hazardous liquids while pipe maintenance is still ongoing.

Non-sparking material

- The pipe blind lockout has been UL tested for ISO 80079-36:2016 Explosive Atmospheres and falls within the parameters of the norm.
- The device is built out of heavy duty 304 stainless steel with rugged, cast aluminium locking bars with a powder coated polyester finish.

Widest range of pipes

- With 3 sizes to choose from, Brady's pipe blind lockout is applicable on the widest range of pipes, including all pipe diameters from 13.20 mm to 1219.20 mm.
- The device's extendable locking arm enables users to optionally lock not 1, but 2 pipe bolt sets for additional security.
- Up to 4 workers can apply a padlock directly on the device.
- The device can be used for standard and recessed bolts.

Plug valve lockout

Effective fit for difficult-to-secure plug valves

- Durable and tamper-resistant
- Compact in size and easy to use
- Several sizes to fit most 25 to 203 mm diameter manually-actuated plug valves
- Service temperatures -20 °C to 80 °C
- 1 padlock can be applied.

Order Reference	Specification	Material	Max. Shackle Diameter (mm)	Height (mm)	Diameter (mm)	Quantity

Cylinder tank lockout

Rugged polystyrene plastic device used to lockout cylinder tanks, including propane tanks on fork lift trucks and stand-alone propane tanks.

- Designed to fit in tight spaces
- Valve stem hole is 31.5 mm in diameter
- 2 padlocks can be applied.

Order Reference	Description	Colour	Max. Shackle Diameter (mm)	Min. Shackle Clearance (mm)	Quantity
046139*	Cylinder Tank Lockout	Red	6.50	20.00	1

*This product meets the ATEX Equipment Directive

Gas cylinder lockout

No need to match your lockout device to varying diameters and threads of cylinder caps.

- Prevents access to the main cylinder valve
- Accommodates neck rings up to 88 mm diameter
- Install in seconds to save time
- 1 padlock can be applied

Order Reference	Description	Height (mm)	Diameter (mm)	Max. Shackle Diameter (mm)	Min. Shackle Clearance (mm)	Quantity
045629	Gas Cylinder Lockout	158.80	88.14	8.64	20.00	1

SMC airline regulator

Disables air supply to the equipment being serviced while allowing other equipment, sharing the same air supply, to stay active.

- The device regulator can be locked in ON, OFF or THROTTLED positions
- Easy Installation: remove snap cap, install lockout on regulator rod, snap replacement cap on regulator
- 1 padlock can be applied
- Comes with lockout, cap and allen key

Order Reference	Description	Colour	Diameter (mm)	Max. Shackle Diameter (mm)	Quantity
64540	Intermediate Air Line Regulator for SMC Models AR3000 / NAR3000	Red	34.29	3.81	1
64539	Miniature Air Line Regulator for SMC models AR2000 / NAR2000	Red	34.29	3.81	1

Pneumatic quick-disconnect lockout

Isolates pneumatic energy without the expense and inconvenience of installing in-line lockout valves.

- Device is applied to the male fitting, isolating equipment from all compressed air sources
- Accommodates the majority of 6 mm, 9 mm and 12 mm male fittings
- Hole in centre of device allows for permanent storage on air hose and a loop on the side can be used to hang the hose and lockout device
- 1 padlock can be applied

Order Reference	Description	Colour	Max. Shackle Diameter (mm)	Min. Shackle Clearance (mm)	Quantity
064221	Pneumatic Quick-Disconnect Lockout	Red	7.87	20.20	1
065645	Pneumatic Quick-Disconnect Lockout	Red	7.87	20.20	6

Miniature circuit breaker lockout

A safe and effective method for locking out European Circuit Breakers as it fits most of their existing types.

- Miniature breaker lockout unique in its kind = requires NO TOOLS to install
- The lockout easily installs with the aid of a Push Button
- The tie-bar style lockout has a convenient thumb wheel for quick application
- Suitable for single, multi-pole and rotary breakers
- Made from glass-filled nylon
- Available in single or
- 1 padlock can be applied

Recommended to use in combination with a padlock with a minimum shackle diameter of 6 mm for added safety.

EZ Panel Loc™ system

Covers most 120V-277V breakers!

- Works on wide range of breakers, including single- and multi-pole configurations
- Makes use of unique lock rail system
- Allows panel door to be closed even when lockouts are in place
- Accomodates multiple locks, facilitating group lockout activity without hasps
- Keeps weight off the breakers, protecting delicate electrical components from damage
- Positions locks and tags outside the panel, making sure lockout activity is clearly visible to anyone in the area

▶ Consult the technical datasheet LOTO-45 on bradyeurope.com/tds

▶ Consult the technical datasheet LOTO-46 on bradyeurope.com/tds

CLAMP-ON EZ

SNAP-ON EZ

Lockout device is unlocked by inserting and turning the black plastic key

1. Expose the super-bond adhesive on back of rail. Permanently affix to any location on the panel.

2. Attach the lockout device to the breaker and snap into locked position

3. Pass plastic key through lock rail and attach lock, preventing key from sliding down cable and opening lockout device

4. For group lockouts, run key through multiple loops in lock rail and apply locks. No hasps required! (Not recommended for use with multilock hasps)

5. Low-profile lockouts allow panel doors to be closed on most breaker panels.

BRADY®

TAGLOCK™ circuit breaker securing devices

Step up safety and compliance with physically secure tagout for up to four workers.

- Quick and easy to apply with a nylon cable tie and the worker's ID tag
- Up to 4 workers can apply a nylon cable tie and their ID tag
- Compatible with GE, ITE, Sylvania, Challenger, Bryan, General Switch Co., Westinghouse, etc., breakers
- Alternatively, every model can be locked with 1 padlock

Models and usages :

- **Clamp-on:** works on wide range of single-pole and internal-trip multi-pole breakers, use thumbscrews to clamp lockout securely onto switch tongue, then pull cover over thumbscrew and lock with a nylon tie/padlock in place to prevent clamp from being loosened. Oversized, 480/600V and 120/277V models are available
- **Multi-pole:** works with most two or three pole breakers utilising a tie-bar, use thumbscrews to clamp lockout securely over tie-bar, then insert nylon tie/padlock to prevent clamp from being loosened
- **Switch:** works on wide range of breakers, including single- and multi-pole configurations and allows panel door to be closed even when lockouts are in place
- **Snap-on:** designed for breakers that have holes in the switch tongue, dual cavities accommodate different size switch tongues

Can be secured with cable ties and/or a safety lock

Single pole circuit breaker lockout

Quick and easy – just snap in place and apply a lock!

- Designed for breakers that have holes in the switch tongue
- Dual cavities accommodate different size switch tongues
- 1 padlock can be applied

Consult the technical datasheet LOTO-15 on bradyeurope.com/tds

Order Reference	Description	Max. Shackle Diameter (mm)	Min. Shackle Clearance (mm)	Width (mm)	Depth (mm)	Quantity
065387*	Single Pole Circuit Breaker Lockout	7.14	12.70	54.36	8.38	1
065688	Single Pole Circuit Breaker Lockout	7.14	12.70	54.36	8.38	6

*This product meets the ATEX Equipment Directive.

Fuse lockout

Designed to prevent the unintended re-energisation of a fuse. Fits most fuse holders between 20 Amps and 400 Amps and creates a universal approach to locking out your fuses.

- Material: Nylon with ZP metal slotted set screw
- Instructions: clamp onto the fuse holder and use a small flathead screwdriver to tighten the set screw in the device. Place a padlock through the hole to prevent access to the set screw.
- Label applied stating: DANGER DO NOT REMOVE LOCKED OUT
- 1 padlock can be applied

Order Reference	Description	Height (mm)	Width (mm)	Depth (mm)	Packaging
873367	Fuse Lockout Device 20-400A	35.00	15.00	59.90	1

Universal mini circuit breaker lockout

Easy to apply to a wide range of circuit breakers from various manufacturers (Schneider IC60 series, Siemens 5SX21, Hager MFN716, ABB 2CDS25, ABB S202U-K50).

- Fastened using an attached screw that is easy to handle
- Fastening the screw pushes out a hole for a Lockout/Tagout padlock shackle
- 1 padlock can be applied

Order Reference	Description	Max. Shackle Diameter (mm)	Width (mm)	Depth (mm)	Quantity
149514*	Universal Mini Circuit Breaker Lockout	7.14	60.71	17.27	1
149515*	Universal Mini Circuit Breaker Lockout	7.14	60.71	17.27	6

*This product meets the ATEX Equipment Directive

Consult the technical datasheet LOTO-96 on bradyeurope.com/tds

Clamp-on circuit breaker lockout - Slide cover

Works on wide range or single-pole and internal-trip multi-pole breakers.

- Use thumbscrews to clamp lockout securely onto switch tongue, then pull cover over thumbscrew and lock in place to prevent clamp from being loosened
- Made of rugged Polypropylene
- Detachable cleats (included) expand the range of applicable breakers
- 1 padlock can be applied

Order Reference	Description	Height (mm)	Width (mm)	Depth (mm)	Max. Shackle Diameter (mm)	Quantity
176495	Clamping Circuit Breaker Lockout - 120/277 Volt	55.80	20.30	17.78	7.10	1
176496	Clamping Circuit Breaker Lockout - 120/277 Volt, 6 Pack	55.80	20.30	17.78	7.10	6
176497	Clamping Circuit Breaker Lockout - 480/600 Volt	78.70	30.50	22.86	7.10	1
176498	Clamping Circuit Breaker Lockout - 480/600 Volt, 6 Pack	78.70	30.50	22.86	7.10	6

Low profile breaker lockout

Target individual circuit breakers for lockout tagout and keep the panel door closed with the Clamp-on Circuit Breaker Lockout, low profile.

- Low-profile design allows closing of electrical panel doors and eliminates the need to lock out an entire panel
- Ideal for education, government, hospitals/healthcare and other industries where electrical panel doors must remain closed
- Proprietary thumbwheel design for tool-free application
- Made from fibreglass-reinforced nylon for durability in demanding environments

Order Reference	Description	Height (mm)	Width (mm)	Depth (mm)	Max. Shackle Diameter (mm)	Quantity
177547	Low Profile Breaker Lockout	50.80	25.40	12.70	0.64	1
177548	Low Profile Breaker Lockout - 6 Pack	50.80	25.40	12.70	0.64	6

Rotary circuit breaker lockout

Enhance worker safety and maximise lockout efficiency with the Universal Rotary Breaker Lockout – the most adaptable rotary switch device for streamlined safety and compliance.

- Universal fit securely accommodates most engine switches with a panel height up to 45 mm
- Intuitive thumbwheel design ensures fast, tool-free installation and removal
- Industrial-grade construction withstands harsh environments
- Meets requirements as part of an OSHA-compliant lockout tagout program

Order Reference	Additional Information	Max. Shackle Diameter (mm)
177243	Universal fit securely accommodates most engine switches with a panel height up to 45 mm	7.14

480-600V breaker lockout

Perfect for locking out oversized and irregularly shaped switches.

- Self adhesive backed rails are permanently installed onto an electrical panel – simply clean panel surface and adhere – no drilling required!
- Red blocking bar indicates locked "off
- Green blocking bar indicates locked "on
- 1 padlock can be applied

Order Reference	Description	Colour	Height (mm)	Max. Shackle Diameter (mm)	Max. Switch Width (mm)	Quantity
090891**	480-600V Breaker Lockout Kit*	-	20.32	6.50	150.00	1

*Kit includes: 2 Yellow mounting rails, 1 red blocking bar, 1 green blocking bar and 3 alcohol wipes.
**This product meets the ATEX Equipment Directive.

Breaker Blocker Components - Blocking Bar Holder

Fuse lockout - insulation plugs

- Patented insulation plugs protect people working on current circuits against unauthorised use and inadvertent switching on of power
- Insulation plug is placed into a fuse base by means of a special screwdriver (sold separately 812713) instead of fuse link and screw cap.

Order Reference	Description	Packaging
812713	Industry Insulation Plug Screwdriver	1
812711	Industry - Insulation Plugs DII	1
812712	Industry - Insulation Plugs DIII	1
850958	Industry Insulation Plug Set DII & DIII	1
850957	Low Voltage NV Fuse Rails Set Sizes NH00 & NH1 - NH3 with glove	1
812714	Low Voltage NV Fuse Rails Size NH00	1
812715	Low Voltage NV Fuse Rails Size NH1 - NH3	1

Isolation Plugs

- 2-in-1 Solution - Covers two common screw threads thanks to the two part graded thread diameters.
- For D01 & D02 (E14 & E18) and D11 & D111 (E27 & E33) screw locks.

Includes a yellow key for locking and easy removal of the device from the screw base

Order Reference	Order Reference	Description	Colour	Quantity
309018*	ISOPLUG-D01-D02	Isolation Plugs	Red, Yellow	1
309019*	ISOPLUG-D11-D111	Isolation Plugs	Red, Yellow	1

*This product meets the ATEX Equipment Directive

Fuse blockout devices

Comply with OSHA's Lockout/Tagout Standard by using High visibility red devices in conjunction with Brady Lockout Tags.

- Block out 6.0 mm to 17.5 mm and blade type fuses

Order Reference	Description	Notes / Details	Colour	Quantity
065690	Fuse Blockout Devices	For 6.35 mm, 7.14 mm, 10.33 mm, 14.29 mm fuses	Red	6
065691	Fuse blockout devices	For 20.64 mm, 26.99 mm, and blade type fuses	Red	6

*This product meets the ATEX Equipment Directive.

Consult the technical datasheet LOTO-49 on bradyeurope.com/tds

Detachable power cord plug lockout

Ideal tool for preventing tampering with office equipment, computers, peripheral equipment and power supplies.

- The device works as a block to prevent power going to the socket by simply plugging into the socket and twisting.
- Compact size and lightweight, nylon construction make this device easily portable.
- 1 padlock can be applied

Order Reference	Description	Colour	Quantity
148081	Detachable Power Cord Plug Lockout	Black, Orange	1

Stopower™ plug lockouts

Device is simple to use - just slide over cord prongs and lock with key.

- Ideal for office equipment and other frequently locked out cords
- Cord cannot be plugged in with Stopower in place
- For use on 2 or 3 pronged polarised plugs
- Device cannot be removed without a key
- Standard devices are individually keyed

Order Reference	Description	Colour	Quantity
065673	Stopower Plug Lockout	Red	1

Wall switch lockouts

Wall switch lockouts may be used with most wall-mounted switches.

- Easily installs over wall plate using existing screws
- Hinged cover conveniently flips up for on/off adjustment and snaps closed to keep switch locked in position using padlock or hasp (sold separately)
- Trilingual labels (English, French and Spanish) help keep all employees informed and instructed
- 60.45 to 96.77 mm screw install range and 20.32 mm max. toggle length accommodate a range of sizes

Order Reference	Description	Material	Text/Legend	Colour	Max. Switch Width (mm)	Quantity
065392	Universal Wall Switch Lockout	Polycarbonate	DANGER LOCKED OUT DO NOT REMOVE/DANGER VERROUILLÉ NE PAS ENLEVER/PELIGRO EQUIPE BLOQUEADO NO REMUEVA	Red	34.29	1
65696	Universal Wall Switch Lockout - 6 Pack	Polycarbonate	DANGER LOCKED OUT DO NOT REMOVE/DANGER VERROUILLÉ NE PAS ENLEVER/PELIGRO EQUIPE BLOQUEADO NO REMUEVA	Red	34.29	6

3-in-1 electrical plug lockout

Accomodates high and low-voltage plugs up to 76.0 mm in diameter and 139.0 mm in length.

- Two sliding top lids can be used individually or together to accomodate small, medium and large diameter cords up to 31mm
- Made in bright yellow thermoplastic
- With English instruction labels
- 1 padlock can be applied

Order Reference	Description	Colour	Height (mm)	Diameter (mm)	Cable Diameter (mm)	Quantity
045842	3-in-1 Electrical Plug Lockout	Yellow	158.75	88.14	31.75	1

*This product meets the ATEX Equipment Directive.

Lockout devices for plug connections

Highly effective against unauthorised or incorrect use of electrical equipment.

- Simple to use
- Especially developed to secure all types of plugs

▶ Consult the technical datasheet LOTO-29 on bradyeurope.com/tds

Order Reference	Description	Colour	Max. Shackle Diameter (mm)	Min. Shackle Clearance (mm)	Width (mm)	Cable Diameter (mm)	Max number of padlocks applied	Quantity
065675	Lockout Devices for Plug Connections - Large	Red	9.14	20.07	177.80	12.70	4	1
065674*	Lockout Devices for Plug Connections - Small	Red	9.14	20.00	88.90	12.70	2	1

Hubbell plugout for industrial plug connections

Effectively secures all industrial plug connections.

- Fits the majority of your heavier industrial plug applications
- Small version accepts plugs with maximum 69.85 mm diameter and 120.65 mm length with 25.40 mm cord.
Order Reference	Specification	Colour	Height (mm)	Diameter (mm)	Plug Length (mm)	Plug Diameter (mm)	Max. Shackle Diameter (mm)	Cable Diameter (mm)	Min. Shackle Clearance (mm)	Max number of padlocks applied	Quantity
065695	Hubbell Plugout - Small	Yellow	185.70	79.00	120.65	69.85	9.40	30.48	20.00	4	1
065968	Hubbell Plugout - Large	Yellow	316.60	128.60	261.62	114.30	9.91	37.08	20.00	4	1

Large electrical/pneumatic lockout

Accommodates a large variety of electrical plugs up to 89 mm diameter and 127 mm in length as well as male air hose connectors.

- Works on 110V, 220V and 550V plugs
- Made of Polystyrene material
- 4 padlocks can be applied

▶ Consult the technical datasheet LOTO-30 on bradyeurope.com/tds
Order Reference	Description	Colour	Max. Shackle Diameter (mm)	Min. Shackle Clearance (mm)	Plug Diameter (mm)	Plug Length (mm)	Quantity
800126	Large Electrical/Pneumatic Lockout	Red	7.87	20.00	88.90	127.00	1
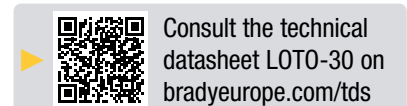

Pendant Lockout Safety Cover

No undesired crane control

- Completely cover crane or hoist pendant controls to prevent anyone from pressing any pendant buttons before removing up to 4 padlocks.
- Can be applied just like a bag, extended to cover all pendant controls from 10 to 45 cm long and can be folded flat for easy transport.

Order Reference	Description	Depth (mm)	Height (mm)	Width (mm)	Max. Shackle Diameter (mm)	Quantity
150587	Pendant Control Safety Cover	127.00	127.00	558.80	9.53	1
151252	Pendant Control Safety Cover - Large	227.00	227.00	1092.20	9.53	1

Lockout bag

For securing plugs on portable appliances, cables on pneumatic connectors, crane pendants, etc.

- Made of rugged canvas with drawstring
- Can be locked closed
- Legend: LOCK OUT FOR SAFETY

Consult the technical datasheet LOTO-98 on bradyeurope.com/tds

Order Reference	Description	Height (mm)	Width (mm)	Quantity
065780	Lockout bag made of rugged canvas with drawstrings	247.65	457.20	1

EV charging port & plug lockout

Accelerate safety in electric vehicle assembly and maintenance with the EV Charging Plug Lockout – an industry first from the leader in lockout tagout.

- Constructed of non-conductive nylon to stop electrical hazards
- Fits all charging ports and plugs designed to the North American Charging Standard (NACS)
- Tamper-resistant features prevent unauthorised removal
- Won't interfere with surrounding equipment and parts
- Withstand harsh environments and repeated use
- Easily snap into place and secure with a safety padlock (sold separately)

Order Reference	Description	Packaging
177588	EV Charging Port Lockout, NACS	1
177589	EV Charging Plug Lockout, NACS	1

BatteryBlock power connector lockout

Easy to use and applicable on a wide range of industrial vehicles, the BatteryBlock Power Connector Lockout is a great addition to your maintenance safety tool kit.

- The BatteryBlock Power Connector Lockout can be used to neutralise the energy flow of all vehicles powered by a battery with 175A to 350A connectors
- The device can effectively neutralise most forklifts, stackers, scissor lifts, pallet jacks and powered carts
- The lockout device has been designed as one piece to limit the loss of parts and further increase its usability.

Order Reference	Description	Depth (mm)	Height (mm)	Width (mm)	Max. Shackle Diameter (mm)	Max number of padlocks applied	Additional Information	Quantity
150841	BatteryBlock Power Connector Lockout	79.00	66.62	134.00	7.87	2	For use with 175A to 350A Plug Voltage	1

Steering Wheel Safety Cover

This brightly coloured Steering Wheel Safety Cover makes it easy to communicate the status of mobile equipment that is being repaired or serviced.

- Ideal for forklifts, electric pallet jacks, construction equipment and fleet vehicles.
- Goes over the steering wheel and is secured with one padlock (no hasp needed).
- A handy pocket on the back of the cover conveniently houses vital information, like inspection cards.
- Can be used with BatteryBlock™ products.

Order Reference	Description	Diameter (mm)	Max. Shackle Diameter (mm)	Max number of padlocks applied	Quantity
151874	Steering Wheel Safety Cover	304.80	7.11	2	1
151875	Steering Wheel Safety Cover	406.40	7.11	2	1
151876	Steering Wheel Safety Cover	508.00	7.11	2	1

BRADY

Twist and Secure™ push button & e-stop covers

Made to temporarily prevent access to the on/off and emergency stop controls for production and facility utility operating equipment.

- Fast and convenient lockout at the point of need.
- One time installation of the low profile, unobtrusive lockout base.
- Provides an obvious, visual indication that the equipment control button is locked out, as well as a view through the translucent cover of the ON/OFF status of E-Stop buttons.
- Standardised bases allow authorised workers to apply a single provided cover to any of numerous equipment control buttons.

Push button lockouts

Guard against unauthorised operation or accidental activation.

- Two sizes to accommodate standard NEMA 30.5 mm and IEC 22.5 mm buttons
- Emergency stop safety covers for permanent installation over push/pull or twist-release emergency stops - made from durable metal bar locks button in the depressed (off) position when lock shackle is inserted
- Push button safety covers to completely cover buttons and prevent access.

Emergency Stop Safety Cover for 22.50 mm button - IEC

Emergency Stop Safety Cover for 30.50 mm button - NEMA

Push Button Safety Cover - IEC

Push Button Safety Cover - NEMA

Order Reference	Description	Height (mm)	Depth (mm)	Button Type	Button Size	Quantity

▶ Push button covers are warnings and tools to support lockout procedures but need to be part of a full lockout procedure to make sure no energy can be accidently released during operations.

Confined space safety covers

Go beyond the basics with visual and lockable Confined Space Safety Covers to keep yourself covered and your crew safe. With this complete line of safety covers, you get coverage for most common confined space entrances.

- Provide a physical barrier and identification of confined spaces instead of signs and tapes that can be missed or ignored
- Restrict personnel access and prevent litter, debris and animals from getting in areas they shouldn't
- Get a complete offering that includes lockable options for added safety and vented options for areas with noxious gasses

Stainless steel scissor action hasp

Designed to provide a maximum tamperproof locking facility

- Made from marine grade (316) stainless steel scissor hasps with a 28 mm diam jaw
- Small shackle size for 4 mm hasp holes
- 6 padlocks can be applied

Order Reference	Colour	Max. Shackle Diameter (mm)	Shackle Diameter (mm)	Quantity
852440	Silver	9.53	28.00 mm	1

Stubby lockout

Lock out small switch boxes to large control units and levers with one device - no need for separate hasps of different sizes!

- Two-in-one hasp sizes: 31.75 x 44.45 and 19 mm diameter
- To be used when lockout conditions vary in size
- 6 padlocks can be applied

Order Reference	Colour	Max. Shackle Diameter (mm)	Min. Shackle Clearance (mm)	Quantity
236919	Red	9.53	20.07	1

Economy lockout

- Use on fuse or switch boxes
- Made from sturdy steel
- Hasp shackle diameter: 25.4 mm
- 6 padlocks can be applied

Order Reference	Colour	Max. Shackle Diameter (mm)	Min. Shackle Clearance (mm)	Quantity
236920	Red	10.01	20.00	1

BRADY

Nylon lockout hasp

Locks out any piece of equipment safely and effectively.

- Non-conductive nylon hasps accommodates up to 6 locks
- Weighs only 30 g
- Lockout Shackle fits in holes with a minimum diameter of 7 mm

Order Reference	Colour	Max. Shackle Diameter (mm)	Min. Shackle Clearance (mm)	Quantity
236916*	Orange	9.00	6.50	1

*This product meets the ATEX Equipment Directive.

Dual safety hasps

This lockout device enables a supervisory padlock (6 holes) or two supervisory padlocks (12 holes) to remain safely locked in place, ensuring that the machine remains isolated.

- Foolproof access to the hasp entry and a tamperproof locking facility add another degree of safety
- Made from marine grade stainless steel (316)
- The lockout device has a 5.00 mm shackle that will fit most electrical & switch gear cabinets and distribution boards
- Available in 6 holes x 1 supervisory, or 12 holes x 2 supervisory configurations

Order Reference	Description	Colour	Shackle Clearance (mm)	Quantity
873384	Dual Level 12 Hole Safety Lockout	Red	35.00	1
852439	Dual Level 6 Hole Safety Lockout	Red	35.00	1

Non-conductive lockout hasp

Offers high flexibility, resistance to cracking and most chemicals and has excellent electrical insulating characteristics!

- Made of strong, rigid red plastic resin
- Performs at low temperatures, excellent heat resistance
- Lockout Shackle fits in holes with a minimum diameter of 10 mm

Order Reference	Description	Colour	Shackle Diameter (mm)	Min. Shackle Clearance (mm)	Quantity
045582	Non-Conductive Lockout Hasp	Red	6.10	20.00	1

Labelled safety lockout hasp
Combination of lockout and tagout - one device for multi-task performance!

- A single employee can lock out and service equipment, and up to 5 additional employees can apply their locks and tags
- Tough 5052 anodised aluminium alloy
- Use pens, pencils and permanent markers
- Text from pens and pencils can be erased
- Holds up to 6 locks

Order Reference	Text/Legend	Colour	Max. Shackle Diameter (mm)	Min. Shackle Clearance (mm)	Height (mm)	Width (mm)	Depth (mm)	Quantity

Labelled group lockout hasps
Make sure your workers are safe by supplying labelled lockout hasps for all of their group lockout procedures.

- Constructed from tough 5052 anodised aluminium alloy
- Includes tamperproof locking tabs
- Write-on label surface accepts pencils, pen or marker
- Pen and pencil markings can be easily erased, allowing repeated use
- Combination pack contains 1 of each colour
- Legend on the front side: DANGER DO NOT OPERATE
- Lock holes 8 mm
- Holds up to 6 locks

BRADY

▶ Brady offers a range of well-equipped lockout tagout kits. The kits are designed to help workers to establish an effective and safe lockout program and to help them comply with company lockout procedures and health and safety regulations. The range consists of several different lockout tagout kits, where each kit has been designed with a different need in mind.

Remember - an effective lockout procedure saves time, saves money and saves lives!

Ultimate lockout kit

This is our most extensive lockout/tagout kit and includes everything a larger company might need for their lockout/tagout program as well as training material.

Electrician lockout kit
Most popular circuit breaker lockout devices allowing to lock a wide range of circuit breakers

- The basic kit can be combined with any padlock sets, already available or to be ordered (allowing any key chart)
- The kit also exists with 2 red full nylon padlocks, ideal for electrical applications and to be used with these lockout devices
- As best practice, it's always advised to place a tag when a lockout device is placed to inform other workers. New Mini tags have been developed for this application. (dimensions: 100 x 25 mm, 50 tags / pack)
- Mini tags available in 9 languages

Electrician Lockout Kit (196217) includes:
1 x 090847 - Miniature Circuit Breaker Lockout Pin-In-Standard (PIS)
1 x 090844 - Miniature Circuit Breaker Lockout Pin-Out-Standard (POS)
1 x 090850 - Miniature Circuit Breaker Lockout Pin-Out-Wide (POW)
1 x 090853 - Miniature Circuit Breaker Lockout Tie Bar (TBLO)
1 x 149433 - Miniature Circuit Breaker - Pin-out Wide (ABB-MS325)
1 x 176495 -Clamping Circuit Breaker Lockout - 120/277 Volt,
1 x 176497 - Clamping Circuit Breaker Lockout - 480/600 Volt
1 x 800112 - Cable Lockout Device
1 x 236916 - Nylon Lockout Hasp
1 x 050979 - Large Lockout Pouch
1 x 335091 - Pen

ISOLATION AND PERMIT BOARD
Improve productivity with durable, visually organised shadow boards

Strengthen your lockout tagout program thanks to a dedicated shadow board. Display your devices, padlocks and documents to make them clearly visible and easy to chose for the users.

Effective visual management and real time communication is vital for safe control of work (CoW) and achieving objectives set by 5S and LEAN)

Features & benefits

- Durable clear plexiglass (Sub-surface graphics) or laminated white foam PVC
- Clean, crisp protected graphics that will not scratch off from frequent tool use
- Perforated to place each necessary fixing
- Customised hole positions
- Fixings optional for mounting flexibility
- Assist control of permit to work

How to order your LOTO shadow boards

You can create your own shadow board. Draw what you have in mind. Add padlocks, locking devices and accessories. Choose the material, layout, border and corners for your shadow board. Finally, add your own text and logo.

As each board is unique, pricing will be on request, based on information provided to give a size estimation of the the board. Please contact your Brady representative to get futher details.

Brady custom tags
To produce your custom tag(s), Brady requires the following information for each type/design of the tag you need:

1. Select from the 3 basic types of tags: General Warning, Electrical Warning, Prohibition (see sample previews)
2. Select the size (110 x 50 mm or 160 x 75 mm)
3. Indicate quantity of packs (1 pack consists of 10 pcs of tags and 10 pcs of cable ties)
4. Define your text for the box in the central area of the tag

Send your request for quotation containing all information listed above to your Brady representative or distributor

General Warning

Electrical Warning

Prohibition

All these tags meet the ATEX Equipment Directive

BRADY

Process tags

Easily communicate work equipment process management and control using highly practical and eye-catching colour-coded tags.

- Visualise management and control of work equipment processes
- Applications include cylinders and tanks, equipment, leaks and contamination, hoses and valves
- Share important safety information where it matters
- Reliable, chemical resistant, and easy to apply with cable ties
- Material: 0.5mm polypropylene.

Re-writable lockout tags

- Height: 160 mm, Width: 75 mm
- Material: Rigid PVC tag with polyester overlaminate

Two-part perforated tags

Two-part tags provide enhanced operational control and record keeping.

The stub is removed when the tag is attached to a lockout point. Only the employee in possession of the stub has the authority to remove the tag. After the job is done, the stub is returned to management for verification and monitoring of Lockout/Tagout activity in the plant. Matching identification numbers are printed on each part.

Reverse

Heavy cardstock tags

- Economical cardstock tags are easy to write on using pen, pencil or permanent marker (B-853)
- Tear resistant 9.5 mm rolled brass eyelet
- Tie strings included for quick, easy attachment

Polyester tags

- 10 mil (1 mil = 25,4 μm) thick polyester enhances durability and makes it easy to remove chemicals, grease and grime (B-851)
- Write-on surface accepts marker, pen or pencil
- Weatherproof for outdoor use
- 9.5 mm rolled brass eyelet that fits over most padlock shackles
- Nylon cable ties included for easy, secure attachment

We make products that make the world a safer and smarter place. From the depths of the ocean to outer space, from the factory floor to the delivery room - we're just about everywhere you look.

To help minimise our impact on the environment, Brady limits its number of reprints.

Updated versions are always available for download on bradyeurope.com/downloads.
