

# Pipe Blind Lockout Device with 2 Bolt Security

To keep workers safe during pipeline maintenance and prevent a release of energy, a pipe blind provides a physical barrier that contains pipe contents. Brady's Pipe Blind Lockout further ensures the pipe blind stays in place, while also visually indicating that the pipe is locked out.

To keep your facility safe and compliant with OSHA regulations, this device offers fast, easy and secure lockout for pipe blinds. With versatile application options and three different sizes to choose from, users can secure pipes from 3.0 to 48 inches in diameter.

## ▶ Pipe Blind Lockout Device

- Added security with 1 or 2 flange bolt locking options
- Quick and effective lockout with up to 4 padlocks
- Extendable locking arm to secure recessed bolts
- Material designed for EPL Gb and Gc Explosive Atmospheres\*

## ▶ Flag Style Blind Tags

- Provides additional visibility on installing the pipe blind, or showing blind is in place
