

Safety is personal

PrintFace: see a person, not a padlock

What is PrintFace?

A SafeKey padlock is often the last obstacle between premature machine energisation and a maintenance accident with impact on personal and professional lives. Now you can print a face on SafeKey Nylon Padlocks to make it very clear people are at risk when the locks are tampered with.

Why PrintFace?

PrintFace offers a higher level of customisation and better visual impact compared to other padlock personalisation methods.

Fully customisable

Add a photo, logo, text, serial number and much more.

Highly resilient

Resists abrasion, chemicals and UV-radiation.

Visual impact

Full colour print in high resolution directly on the padlock.

Padlock personalisation methods

ULTIMATE

By printing (PrintFace)*

Print a face or any other personalisation in high resolution directly on the padlock, because safety is personal.

The print resists abrasion, chemicals and UV-radiation and can be applied both to the front and back of the padlock.

*PrintFace is exclusively available on SafeKey padlocks with custom keying or standard keying option. To find out more about the full range of SafeKey padlocks, please visit www.bradyeurope.com/safekey.

ADVANCED

By engraving

Brady offers reliable laser engraving for all our Lockout/Tagout padlocks. Ideal in abrasive or heavy industrial contexts.

STANDARD

By labelling

Use the labels included with your Lockout/Tagout padlocks. It can include the name of its owner and a phone number or any other information.
