Software Selection Guide

Brady Corporation is the world leader in the development and manufacture of products that identify and protect premises, products and people.

We are focused on delivering complete solutions, with integrated printing, software and materials.

Brady's selection of powerful, flexible label & sign creation software offers a choice of features, print technologies and operating systems to meet today's growing identification needs.

Software categories:

Brady Workstation Platform

Brady's downloadable software platform allows you to select the label creation applications you need. Within the platform, acquire only the apps you need and choose from a broad offer including amongst others: label creation apps, Print Only capabilities and guided safety applications.

LabelMark™

Especially developed for identification applications in the telecom, electrical, laboratory and general industrial markets. LabelMark™ Label Creation Software is a fast system for creating and printing professional, accurate and legible labels.

MarkWare™

Signmaking, safety warning signs, warehouse and rack labelling and hazardous material labelling can easily be designed with the MarkWare signmaking software.

Codesoft™

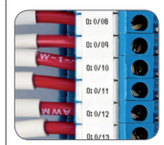

Codesoft is Brady's software offer for advanced barcode label design and integration. It is the professional solution for the most complex barcode and labeling projects. It allows users to design and print custom labels for product identification and tracking.

Use the Software Selection Guide to guide you through your choice

BRADY
WHEN PERFORMANCE MATTERS MOST™

Software Selection Guide

	Circuit Board and Component Tracking	Control Panel and Component Marking	Data Communications Labelling	Energy Source Labelling	Visual Equipment Controls	General and Industrial Labelling	Hazardous Material Labelling	Warehouse Bin and Shelf Labelling	Terminal Block Identification	Vial, Tube and Slide Identification	Voice and Data Equipment Labelling	Automation and in line printing
	Produce labels for circuit board and component tracking. These labels are durable, professional looking identification that can withstand extreme temperatures and harsh environments.	Control panel and component marking labels can be used both in and outside of your control panel. Push button, safety, terminal block, wire and power identification are just some of the labels available for control panel identification.	Create clear, professional looking labels for your network's cables, closet hardware, racks, panels, workstations, and more and see how it can improve labelling efficiency at your facility.	Create your facility's energy source identification for Lockout Tagout compliance.	Create lean visual equipment controls like gauge labels, fluid level indicator labels, gradient rulers, and customise them to your personal needs.	Quickly design labels and label templates on a PC using text,images, logo's, linear or 2D Barcodes. Complete your labels with data either entered manually or imported from spreadsheets or databases. Create bin, rack, product, replenishment, lean labels and much more!	Create your GHS/ CLP labels using design templates that incorporate all the phrasing, pictograms and features you need for your hazardous material identification.	Warehouse bin, shelf and racking labels can be created in seconds.	Label design wizards can help you create terminal block labels with a variety of serialisation and import features, even from Microsoft Excel, AutoCAD or Visio.	Design labels for short to long-term sample identification and tracking. Create labels for vials, tubes, straws, well plates, slides, flask, PCR and cryo vials and tubes.	Brady's labelling software is an efficient and effective way to identify cabling, networks, panels and other voice and data equipment.	Enable operators in the production line to complete protected label templates by importing data from your systems or by filling out predefined fields. Add label data when relevant, while guarding label consistency.
