

Spill Containment Solution

www.bradyeurope.com

Enables the safe
and regulation
compliant storage
of hazardous
substances.

Brady's spill containment solutions enable the safe and regulation compliant storage of hazardous substances, aggressive chemicals and flammable substances stored in drums, containers or IBCs.

Features & Benefits

- Extra high load and sump capacity
- The capacity meets/exceeds European, UK and US standards
- Manufactured from environmental friendly and fully recyclable UV-stabilised polyethylene
- Resistant against most oils, acids, alkalis and aggressive chemicals
- The lack of steel parts guarantees protection from corrosion
- DiBt approved for the German market
- Compatible with most forklifts and pallet trucks.

SPC Spill Containment Solutions

Brady's spill control pallets and decks are very practical. They can easily be lifted from all sides by a forklift, are durable and can carry up to 4 heavy drums or 2 IBC containers.

Workfloor:

Workfloors are a great way to handle and store hazardous fluids and contain potentially hazardous leaks in storage and dispensing areas. This workfloor unit can hold/carry 2 or 4 drums or smaller containers and can be easily assembled with other units by using the connector system.

- Load capacity (2 / 4 drums)
1350 / 2700 kg
- Sump capacity (2 / 4 drums)
112 / 232 litre.

Spill Pallets:

Spill containment pallets control drum or container leakage. Our spill pallets are made of high performance polyethylene and 100% recyclable. This pallet can carry 2 or 4 drums.

- Load capacity (2 / 4 drums) 650 / 1250 kg
- Sump capacity (2 / 4 drums) 250 / 485 litre.

Spill Pallets, EURO:

The spill drum pallet - EURO is the most flexible solution in the market, use with its platform or place a Euro pallet directly into the sump to save money. It's made of high performance polyethylene and 100% recyclable. This pallet can carry 2 drums. The EURO version can be used with or without grid.

- Load capacity 650 kg
- Sump capacity 230 litre.

IBC Spill Pallet:

IBC containers are a most common way to carry, handle and store hazardous fluids. These durable pallets come with a high load and sump capacity which meet / exceeds European legislation. There are 2 versions available; a single and twin version. The single version can be used with or without platform.

- Load capacity (1 / 2 IBCs) 2000 / 3000 kg
- Sump capacity (1 / 2 IBCs) 1120 / 1130 litre.
