

Stainless Steel Tags

Extreme High Temperature Resistance

B-7304: Stainless Steel Grade 304 Tags and Ties
B-7316: Stainless Steel Grade 316 Tags and Ties

When environments get so extreme that no label can fulfil your identification needs, Brady offers stainless steel cable tags, able to resist aggressive environments and temperatures of up to 920°C.

Stainless Steel Cable Tags are made out of stainless steel 316, in various widths and heights. They can be laser engraved or engraved using a laser paste and a CO2 laser engraver, and they are also offered in pre-printed (PR) versions.

Extremely durable cable ties, a match for virtually every aggressive environment, are offered with a 4.5-4.6 (ST), 7.9 (HD) or 10 mm (WD) width and various heights. These cable ties, made from durable 304 or 316 stainless steel, provide a very long lasting and durable marker when coupled with a 316 Stainless Steel Cable Tag.

Application of 316 Stainless Steel Cable Tags and Ties becomes real simple with our securing tool, capable of both cinching and cutting ties. Spare teeth (MG) are available for this tool.
