

## ***Junior Material Support Analyst***

***To cater to our increasing growth Brady, an international manufacturer and marketer of complete solutions that identify and protect premises, products and people, is hiring a Junior Material Support Analyst.***

### ***About the job:***

As Junior Material Support Analyst, you will:

- *Analyze customer requirements/specifications and work together with sales to find the best solution for customers;*
- *Plan and conduct testing activities to qualify materials according customers' specification;*
- *Solve technical problems related to design, application and performance;*
- *Be involved in technical aspects of material development projects / new material constructions in co-operation with marketing, production and printer department in order to come up with innovative solutions to meet customer needs;*
- *Advice production and the printer department on materials related questions and projects;*
- *Work closely together with manufacturing for testing materials on existing and new manufacturing methods;*
- *Support sales and marketing with technical product knowledge. You answer technical questions to analyze and support field applications;*
- *Have regular contact with the global R&D department to discuss ongoing projects and share information;*
- *Occasionally you have to travel (max. 5% of the time).*

### ***About you:***

*Ideally you are a candidate with a Professional or Academic Bachelor's degree in a science related field and you already had a first (2-5 years) working experience. Technical affinity with printing, labeling, coating and adhesives systems is not required but can be a plus.*

*In addition to the science part we're looking for a true team player who is proficient in English, has an eye for detail, can prioritize work independently and most of all has the eager to be welcomed by a warm team in a modern, international, multifaceted and supportive environment.*

### ***About (Y)our team:***

*As Junior Material Support Analyst, you will be part of the European Lab team based Zele. This team is responsible for pre- and post technical sales support and is working on New Product*

*Development initiatives for materials for the Product Identification, Wire Identification and Safety & Facility Identification portfolio for the EMEA region.*

***What we promise you:***

*Brady is an inspiring place to work at. You will be part of a team of professionals, all driven by a desire to innovate and to always improve. Brady offers a challenging environment encouraging out of the box thinking. As such, next to developing new concepts, there is room to re-invent the daily business fitting the varying team competences. Join us and let's build, develop and change the future!*

***What's next?***

*Send an email, with your CV and a short introduction, to [jobszele@bradycorp.com](mailto:jobszele@bradycorp.com) and you will hear from us.*

*If this job does not fit your profile but you know someone who might be interested, please give them that chance and share this vacancy.*
