

Project & Sourcing Engineer

Are you ready to join a highly engaged and motivated team and create difference and impact for Brady and its customers?

Brady, an international manufacturer and marketer of complete solutions that identify and protect premises, products and people, is looking for a seasoned and passionate Project & Sourcing Engineer.

This job is a full-time position and is based in Zele (Belgium). You will be part of an international team working for markets in Europe, the Middle East and Africa and you will report to the Strategic Projects & Sourcing Manager.

About the job:

As a Project & Sourcing Engineer, you will:

- Will be a member of the DAT (Day After Tomorrow) Team, a team that creates innovations and drives strategic projects.
- will be responsible for the development, formulation and implementation of the Strategic Sourcing strategy and programs to support the innovation strategy for the IDS EMEA business unit.
- Will be responsible for make or buy exercises for existing and innovative product solutions: from analysis, towards creating the business case, until the implementation of the decision (buy from external vendors or manufacture inhouse or outsource manufacturing)
- Manage supplier relationships including the development, negotiation and management of contracts with suppliers. Manage the vendor selection and negotiation process, monitor compliance and implement improvement projects in cooperation with other departments like . Operational Purchasing-, Product Management, Manufacturing
- Find, audit and asses new or alternative suppliers in order to create value and/or enable Brady's growth ambitions

About you:

There is more than one way to the perfect fit – here are some of the ideal things:

- You achieved a degree in engineering;
- You have experience in sourcing or sales, business development, project management,...
- You have at least 5 years of expertise in a similar position or in the plastic injection molding industry;
- You have an entrepreneurial mentality and knows how to get results in a multidisciplinary team and how to enthusiase your colleagues;
- Your self planned travel time will be around 15%.

About (Y)our team

The DAT team is a strategic team responsible for the development and realization of radical innovation and long term strategic initiatives. The team is working multidisciplinary amongst technical developments and machinery integrations, new manufacturing design, niche markets business development, sales enablement, strategic sourcing and acquisition scouting and cultural change.

What we promise you:

Brady is an inspiring place to work at. You will be part of a team of professionals, all driven by a desire to innovate and to always improve. Brady offers a challenging environment encouraging out of the box thinking. As such, next to developing new concepts, there is room to re-invent the daily business fitting the varying team competences. Join us and let's build, develop and change the future!

What's next?

Send an email, with your CV and a short introduction, to valerie_ommeslag@bradycorp.com and you will hear from us.

Looking forward!
