Solution components

Choose what fits your fleet

Whether you prefer manual flexibility, fully automatic checks, or a hybrid approach, our solution adapts to your workflow - and can be installed in any vehicle. Build the setup that suits your vehicle configuration and field routines, while enabling fast, accurate, and reliable inventory processes.

Portable RFID readers

Perform manual scans in seconds and home in on misplaced tools with visual and audible guidance.

Fixed RFID readers

Automatically registers items as they move in or out of the vehicle.
Hands-free, fully automated scans reduce manual checks and save time.

RFID labels

Battery-free, durable labels and tags that stay attached to every tool or asset, enabling reliable digital inventory confirmation.

Scan & drive

Instantly see which tools are present in a vehicle - and what is missing. Easily save substantial time per vehicle, per intervention, with automated equipment inventory checks that take only seconds.
