

Brady Workstation Lockout Writer App

workstation.bradyd.com

Create compliant lockout tagout labels, tags and procedures in no time!

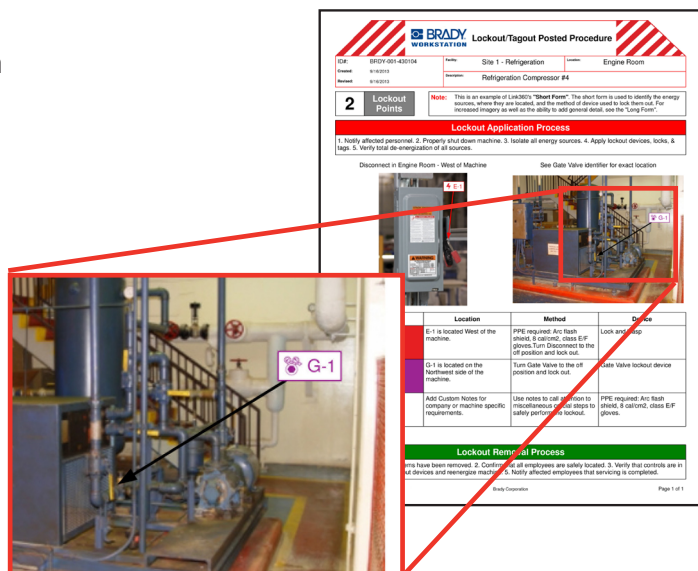

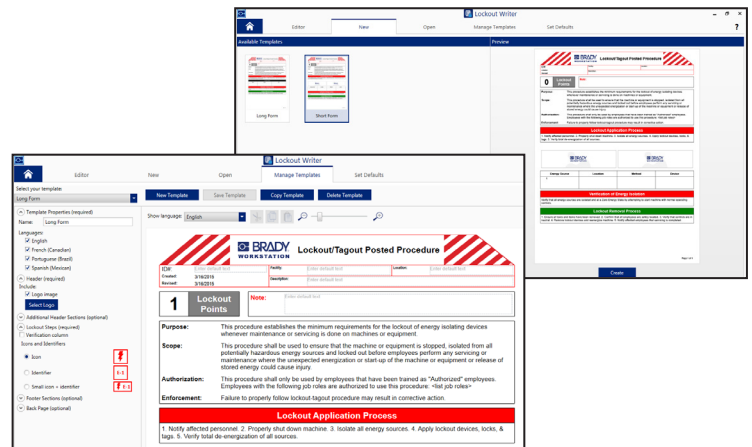

The Brady Workstation Lockout Writer app makes label, tag and procedure creation easier. It includes procedure templates, simple translation between set languages, easy-to-use image editing for callouts, and import capabilities from Lockout-Pro™ software. It also features drop down menus for navigation between hazards, energy sources and devices to help you create custom standards.

Step-by-Step Procedure Formatting

Don't waste time creating procedures from scratch. With the Lockout Writer app, you'll have a step-by-step guide to procedure creation. That way you can write procedures the right way the first time – every time.

Easily Add Photos to Procedures

Give your employees the clear direction they need to perform lockout tasks safely and effectively. That means incorporating pictures into procedures to visually guide employees along the way. With this app, adding pictures is simple and once a photo is added, you can go a step further to click and drag energy source tags to properly identify equipment photos.

Brady Workstation – Lockout Writer App

Quickly Print Tags & Labels

With procedures covered, it's on to lockout tags and energy source labels. Easily and instantly pull the details from your lockout procedure onto your tags and labels for quick, hassle-free printing.

Looking to add collaboration and controlled document workflow to your procedure creation process?

Brady also offers its LINK360® software that not only allows you to create procedures, but also store, manage, approve and track your procedure and procedure audits to support a sustainable lockout program.

Print Your Procedures & Labels

Once created, your lockout labels can be printed on Brady's BBP®31, BBP®33 and GlobalMark®2 Printers. If you don't have a printer, you can email us at bradyusaquotes@bradycorp.com for a custom printing quote.

Procedures can also be printed on any laser or ink jet printer.
