

Quickly Complete Identification with Brady Workstation Terminal Block App

Easily create and print both terminal block and associated wire labels without switching software using the Brady Workstation Terminal Block app. This intuitive solution saves you time and reduces errors by replicating data from your terminal block strips to your wire markers, so you can get back to the task at hand. Whether you have higher- or lower-print volumes, this software is compatible with a variety of benchtop and portable printers from Brady, so you can choose your label material based on your printer, application and budget needs. Other built-in time-saving tools include:

- **Layout editor.** Design and save terminal block layouts by setting pitch, number of blocks, insulating spacers and widths.
- **Data configuration options.** Import data, create a label sequence or manually enter text onto your terminal block strips.
- **Print options.** Print terminal block strips, wire markers or both.
- **Smart cell technology.** Speed setup by knowing the material loaded in your Brady printer.

▶ Full Terminal Block and Wire Marker Identification Solution

For a complete identification solution, pair the Brady Workstation Terminal Block app with Brady printers and label material.

Printers

- **Portables.** Print to the BMP®41, BMP®51, BMP®61 and BMP®71 portable printers
- **Benchtops.** Print to the BBP®12, BBP®33, BradyPrinter i5100, BradyPrinter i7100, IP300, IP600 and PR Plus benchtop printers

Terminal block materials

- **Continuous tape.** Continuous tape ≤ 0.625 in. width on portables and ≤ 0.5 in. width on benchtops
- **Terminal block parts.** More than 20 different terminal block parts, specifically designed for terminal block print strips

Full Terminal Block and Wire Marker Identification Solution cont.

Wire markers

- Self-laminate / wraparound
- Flags
- Sleeves

Software

- **Brady Workstation Terminal Block App.** Quickly label terminal blocks and associated wires.
Catalog # BWS-TB-EM
- **Brady Workstation Text Labels App.** Simple designing for text-only wire and cable labels.
Catalog # BWS-TL-EM
