

Efficiently monitor battery temperatures

UHF RFID temperature sensing labels
Battery-free. Cost efficient.

Apply. Protect.

- Real-time alerts
- Accurate monitoring
- Cost-effective

Increase fire safety. Save time. Reduce cost.

Complete, cost-effective temperature monitoring solution

- ▶ Battery-free RFID labels
- ▶ Embedded temperature sensors
- ▶ Wireless temperature readings
- ▶ Fixed and portable RFID readers
- ▶ Complete software integration
- ▶ Custom temperature alerts

Battery-free RFID temperature monitoring

Apply & protect

Automated asset & temperature tracking

Easily track changes in temperature trends with on- and off-metal, battery-free RFID labels, RFID readers and software integrated in your central systems. Next to monitoring and auto-alerting on temperature changes, our solution also provides automated asset location tracking.

Operations

- ▶ Save time
- ▶ Reduce cost
- ▶ Avoid downtime

Safety

- ▶ Early detection
- ▶ Reduce fire risk
- ▶ Insurance efficiencies

Logistics

- ▶ Real-time inventories
- ▶ Auto-shipment checks
- ▶ Home in on assets

Your needs. Your solution.

Get an automated battery temperature tracking solution that serves your needs, implemented at your sites by experienced RFID engineers. Our teams are available to advise on RFID label and reader selection, to program software, to calculate cost and to implement your automated RFID tracking solution at your premises.
