Installing Printer Drivers

The *Printer Driver CD* includes Windows® printer drivers for **Brady** thermal transfer printers. You can install one or more printer drivers on your PC.

Note: You must have administrative rights on your computer to install or delete a printer driver. If you do not have administrative rights, speak with your computer system administrator.

Windows XP Installations

Use the installation printer driver installation procedures appropriate to the operating system installed on your PC.

Configuration

- Windows XP Professional
- Version 2002, Service Pack 3

BBP®31/33 *Sign & Label Printers* and BMP®51/53 *Label Printers*

Note: Refer to the BNC documentation that came with your printer for details about connecting to the internet.

To install printer driver:

1. Insert the Brady print driver CD.
2. In the *Brady Universal Printer Installation* window, select [*your printer*], then click **Next**.
3. When prompted, disconnect the USB cable from the printer and the PC, then click **Next**.
4. Click the checkbox for **Install USB driver only**, then click **Next**.
5. Turn on your printer, connect the printer to the PC with a USB cable, then click **Next**.
6. In the *Found New Hardware* wizard, select **No, not this time**, then click **Next**.
7. At the prompt *What do you want the wizard to do?* select **Install the software automatically**, then click **Next**. The Wizard locates and installs the printer driver.
8. Click **Finish**. The driver is ready to use.
