One of the recommended basic protective measures against the new coronavirus is social distancing. Social distancing is deliberately increasing the physical space between people to avoid spreading illness. Staying at least 1 meter away from other people lessens your chances of catching COVID-19.

Egress Marking

The 2015 versions of the International Building Code (IBC), International Fire Code (IFC) and the National Fire Protection Agency's (NFPA) 101 Life Safety Code contain new provisions for the means of egress in most new and pre-existing buildings with five or more stories.

Luminous (glow-in-the-dark) egress path markings are now required for the full width of every stair and handrail, among other markings. Brady offers a complete line of egress marking products that meet the current requirements for the 2015 means of egress regulations.
