

BBP[®]30 Sign & Label Printer

High performance industrial printing just got easier!

When you need better performance, better versatility and a better price all in one easy-to-use printer, you need Brady's BBP30 sign and label printer. This entry-level printer combines a compact size with fast print speeds and a range of consumables to make sign and label printing quicker and easier.

It features:

- **Compact and efficient design:** For faster print speeds with a smaller footprint
- **User-friendly functionality:** Easy-to-load tapes and labels with automatic label set up and no calibration, and compatibility with Brady Workstation label creation apps
- **Application versatility:** 100s of durable materials that are ideal for single-color applications, including pipe identification, 5S labels, panel labels, equipment labels, emergency egress marking, pre-printed die-cut labels for safety and warning signs, GHS labels, arc flash labels and more!
